Title: Aquatic Vertebrate Population Study in Mack Creek, Andrews Experimental Forest, 1987 to present

Abstract:

Populations of West Slope cutthroat trout (Oncorhynchus clarki clarki) in two standard reaches of Mack Creek in the H.J. Andrews Experimental Forest have been monitored since 1987. Monitoring of Pacific Giant Salamanders, Dicamptodon tenebrosus began in 1993. The two standard reaches are in a section of clearcut forest (ca. 1963) and an upstream 500 year old coniferous forest. Sub-reaches are sampled with 2-pass electrofishing, and all captured vertebrates are measured and weighed. Additionally, a set of channel measurements are taken with each sampling. This study constitutes one of the longest continuous records of salmonid populations on record.

Keywords: Amphibians; Animal populations; Aquatic habitats; Biomass; Demography; Disturbance; Ecology; Fish; Fish habitat; Fish populations; Floods; Herpefauna; Population dynamics; Resistance and resilience; Stream ecology; Streams; Timber harvesting; Trout; Vertebrates; Populations; Habitats; Populations; demography; ecology; stream ecology; population dynamics; floods; biomass; resistance and resilience; disturbance; timber harvest; aquatic ecosystems; streams; animals; vertebrates; amphibians; fishes; trout; reptiles;

Attributes Definitions:

CLIP
Fin clip type (Onchorhynchus recaptures only). Ended in 2006.

DBCODE
Database Code

DEPTH1
Depth 1 along width1 transect

DEPTH10
Depth 2 along width3 transect

DEPTH11
Depth 3 along width3 transect

DEPTH12
Maximum depth along width3 transect

DEPTH13
Depth 1 along width4 transect

DEPTH14
Depth 2 along width4 transect

DEPTH15
Depth 3 along width4 transect

DEPTH16
Maximum depth along width4 transect

DEPTH17
Depth 1 along width5 transect

DEPTH18
Depth 2 along width5 transect

DEPTH19
Depth 3 along width5 transect

DEPTH2
Depth 2 along width1 transect
DEPTH20
  Maximum depth along width5 transect

DEPTH3
  Depth 3 along width1 transect

DEPTH4
  Maximum depth along width1 transect

DEPTH5
  Depth 1 along width2 transect

DEPTH6
  Depth 2 along width2 transect

DEPTH7
  Depth 3 along width2 transect

DEPTH8
  Maximum depth along width2 transect

DEPTH9
  Depth 1 along width3 transect

ENTITY
  Entity number

LENGTH
  Channel unit length

LENGTH1
  Length type 1 (total or snout-fork length for Onchorhyncus, snout-vent for Dicamptodon). See supplemental information in metadata.

LENGTH2
  Length type 2 (Dicamptodon only--snout-tail)

MAXDEPTH
  Maximum depth channel unit

NOTES
  Comments

PASS
  Electoshocking pass number

PITNUMBER
  Unique pit tag number; tag is embedded in vertibrate. Began in 2007.

REACH
  Reach sampled (in 50 m distances)

SAMPLEDATE
  Date sampled

SECTION
Location of sampling section

SITECODE
  Coded name of sample area

SPECIES
  Vertebrate species sampled

UNITNUM
  Channel unit number (sequential)

UNITTYPE
  Channel unit classification type

VERT_INDEX
  Unique numerical index of vertibrates measured (for creating key field)

WEIGHT
  Weight of individual organism (not taken after 1999)

WIDTH1
  Wetted width of channel unit -- transect 1

WIDTH2
  Wetted width of channel unit -- transect 2

WIDTH3
  Wetted width of channel unit -- transect 3

WIDTH4
  Wetted width of channel unit - transect 4

WIDTH5
  Wetted width of channel unit - transect 5

YEAR
  Year of Survey

Enumerated Domains:

Enumerated Domain for Attribute: CLIP
  LV       Left ventral fin
  LVRV     Left and right ventral fins
  RV       Right ventral fin
  NONE     No ventral fin clip

Enumerated Domain for Attribute: DBCODE
  AS006    FSDB database code AS006

Enumerated Domain for Attribute: REACH
  L        Lower reach of section, 0-50 m
  M        Middle reach of section, 50-100 m
  U        Upper reach of section, 100-150 m
### Enumerated Domain for Attribute: SECTION

- **AL**: Above Lava Falls, in old-growth forest (1996 only)
- **CC**: Cleacut
- **OG**: Old Growth

### Enumerated Domain for Attribute: UNITTYPE

- **C**: Cascade
- **I**: Riffle
- **IP**: Isolated Pools --not connected to main channel
- **P**: Pool
- **R**: Rapid
- **S**: Step (small falls)
- **SC**: Side Channel
- **NA**: Not sampled by unit

### Enumerated Domain for Attribute: DBCODE

- **AS006**: FSDB database code AS006

### Enumerated Domain for Attribute: REACH

- **L**: Lower reach of section, 0-50 m
- **M**: Middle reach of section, 50-100 m
- **U**: Upper reach of section, 100-150 m
