Stream chemistry sampling and analysis was initiated at the H.J. Andrews Experimental Forest in 1968 in two small watersheds (Watersheds 9, 10). Sampling has expanded as additional paired watershed studies (Watersheds 1, 2, 6, 7, 8) and monitoring (Mack, Lookout Cr) were initiated over time. Water samples are collected proportionally to streamflow as a function of stage height and composited at each stream gauging site. Composite sample periods are generally three weeks and 3 one-week samples are commonly composited in the lab before analysis. Water samples are analyzed at the Cooperative Chemical Analytical Lab (CCAL) (http://www.ccal.oregonstate.edu/). Concentrations of analytes include dissolved and particulate nitrogen, phosphorus, carbon, as well pH, conductivity, suspended sediment, and full suite of cations and anions. Monthly and annual mean concentrations are calculated by weighting 3-week periods by streamflow. Fluxes are calculated using concentrations and flow. The original objective was to examine the nutrient budgets for small watersheds and to evaluate changes in average concentrations and fluxes following timber harvest in comparison with unharvested reference watersheds. This study is conducted in conjunction with Andrew's precipitation chemistry (CP002) and the U.S. National Atmospheric Deposition Program (NADP).

**Keywords:** Discharge; Dissolved load; Hydrology; Water; Logging; Long-Term Ecological Research (LTER); Nutrients; Solution transport; Streamflow; Timber harvesting; Water; Water chemistry; Inorganic nutrients; Inorganic nutrients; Organic matter; Long-Term Ecological Research (LTER); Hydrology; Water chemistry; Suspended solids; Discharge; Streamflow; Timber harvest; Inorganic nutrients; Nutrients; Dissolved nutrients; Water;

**Date data commenced:** 1968-10-02

**Date data terminated:** 2019-05-22

**Principal Investigator:** Sherri L. Johnson

**List of Entities:**
1. Proportional stream water sample nutrient concentrations
2. Stream water nutrient mean monthly concentrations
3. Stream water nutrient mean annual concentrations
4. Stream water nutrient monthly outflow (kg/ha)
5. Stream water nutrient outflow (kg/ha) for each proportional sampling interval
6. Stream water sample log sheet: field and laboratory comments

### 1. Proportional stream water sample nutrient concentrations

This is the raw proportional sample concentration data collected periodically (usually every three weeks). Please see mean monthly concentration data provided in entity 2.

---

**5. Stream water nutrient outflow (kg/ha) for each proportional sampling interval**

Data are calculated outflow fluxes for each proportional sample period. Alternatively, please consider use of monthly outflow fluxes provided in entity 4.

### Attributes Definitions:

**ALK**

Alkalinity as calcium carbonate (CaCO3); method: electrometric titration to pH 4.5; all data is converted from the formerly used units of bicarbonate carbon (HCO3-C)

**ALK_MO**

Mean monthly alkalinity concentration as CaCO3 (calcium carbonate)

**ALK_OUT_MO**

Total monthly alkalinity outflow as CaCO3 (calcium carbonate). All units are now converted from HCO3-C (bi-carbonate)

**ALK_OUTPUT**

Alkalinity outflow as CaCO3 (calcium carbonate)

**ALK_YR**

Mean annual alkalinity concentration as CaCO$_3$ (calcium carbonate). All units are now converted from HCO$_3$-C (bi-carbonate)

ALKCODE
Alkalinity value qualifier code

ALKCODE_MO
Monthly alkalinity qualifier value code

ALKCODE_YR
Annual alkalinity qualifier value code

ANCA
Anion-cation ratio: micro equivalence ratio of anions to cations by calculation - provided only as an analytical check. Requires anions: ALK, SO$_4$S, CL, NO$_3$N, PO$_4$P, cations: pH, Na, K, Ca, Mg, NH$_4$N

ANCACODE
Anion-cation ratio qualifier code

CA
Ca, dissolved calcium (filtrable) concentration; method flame atomic absorption spectroscopy

CA_MO
Mean monthly calcium concentration

CA_OUT_MO
Total monthly calcium outflow

CA_OUTPUT
Calcium outflow

CA_YR
Mean annual calcium concentration

CACODE
Ca value qualifier code

CACODE_MO
Monthly calcium value qualifier code

CACODE_YR
Annual Ca value qualifier code

CL
Chloride (dissolved) concentration; method: ion chromatography (automated ferric thiocyanate before 1993)

CL_MO
Mean monthly chloride concentration

CL_OUT_MO
Total monthly chloride outflow

CL_OUTPUT
Chloride outflow

CL_YR
Mean annual chloride concentration
CLCODE
   Cl value qualifier code
CLCODE_MO
   Monthly chloride value qualifier code
CLCODE_YR
   Annual Cl value qualifier code
COND
   Specific conductance; method: wheatstone bridge
COND_MO
   Mean monthly specific conductivity concentration
COND_YR
   Mean annual specific conductivity concentration
CONDCODE
   Conductivity value qualifier code
CONDCODE_MO
   Monthly conductivity value qualifier code
CONDCODE_YR
   Annual conductivity value qualifier code
DATE_TIME
   Collection date and time (PST) of the stream water sample - sample collected proportionally to streamflow from the previous sample date and time. Assume beginning date of first sample period for each collector is October 1st.
DOC
   DOC, dissolved organic carbon concentration; method: combustion
DOC_MO
   Mean monthly dissolved organic carbon concentration
DOC_OUT_MO
   Total monthly dissolved organic carbon outflow
DOC_OUTPUT
   Dissolved organic carbon outflow
DOC_YR
   Mean annual dissolved organic carbon concentration
DOCCODE
   DOC value qualifier code
DOCCODE_MO
   Monthly dissolved organic carbon value qualifier code
DOCCODE_YR
   Annual DOC value qualifier code
DON
Dissolved organic nitrogen - not measured analytically; mathematically determined by subtracting NH3-N and NO3-N from Total dissolved nitrogen. Values before May 2005 are determined by TKN minus NH3-N.

DON_MO
Mean monthly dissolved organic N concentration - not measured analytically; mathematically determined by subtracting NH3-N and NO3-N from Total dissolved nitrogen. Values before May 2005 are determined by TKN minus NH3-N

DON_OUT_MO
Total monthly dissolved organic N outflow - not measured analytically; mathematically determined by subtracting NH3-N and NO3-N from Total dissolved nitrogen. Values before May 2005 are determined by TKN minus NH3-N

DON_OUTPUT
Dissolved organic N outflow - not measured analytically; mathematically determined by subtracting NH3-N and NO3-N from Total dissolved nitrogen. Values before May 2005 are determined by TKN minus NH3-N

DON_YR
Mean annual dissolved organic N concentration - not measured analytically; mathematically determined by subtracting NH3-N and NO3-N from Total dissolved nitrogen. Values before May 2005 are determined by TKN minus NH3-N

DONCODE
Dissolved organic nitrogen value qualifier code

DONCODE_MO
Monthly dissolved organic N value qualifier code

DONCODE_YR
Annual dissolved organic N value qualifier code

ENTITY
Entity number

FIELD_COMMENTS
Field comments related to the collection of the water sample

INTERVAL
Proportional sampling interval length in days

K
K, dissolved potassium (filtrable) concentration; method flame atomic absorption spectroscopy

K_MO
Mean monthly potassium concentration

K_OUT_MO
Total monthly potassium outflow

K_OUTPUT
Potassium outflow

K_YR
Mean annual potassium concentration

KCODE
K value qualifier code

KCODE_MO
Monthly potassium value qualifier code
KCODE_YR
Annual K value qualifier code

LAB_COMMENTS
Laboratory comments related to the handling and analyses of the sample

LABNO
Lab number code for sample

LOW_VOLUME
Indicator of a low volume sampler that may restrict the breadth of laboratory analyses

MEAN_LPS
Mean discharge over the sampling interval

MG
Mg, dissolved magnesium (filtrable) concentration; method flame atomic absorption spectroscopy

MG_MO
Mean monthly magnesium concentration

MG_OUTPUT
Magnesium outflow

MG_YR
Mean annual magnesium concentration

MGCODE
Mg value qualifier code

MGCODE_MO
Monthly magnesium value qualifier code

MGCODE_YR
Annual Mg value qualifier code

MONTH
Month of summary

NA
Na, dissolved sodium (filtrable) concentration; method flame atomic absorption spectroscopy

NA_MO
Mean monthly sodium concentration

NA_OUTPUT
Total monthly sodium outflow

NA_OUTPUT
Sodium outflow
NA_YR
Mean annual sodium concentration

NACODE
Na value qualifier code

NACODE_MO
Monthly sodium value qualifier code

NACODE_YR
Annual Na value qualifier code

NH3N
Ammonia-nitrogen (NH3-N) concentration, ammonia as nitrogen; method: automated phenate

NH3N_MO
Mean monthly ammonia-nitrogen (NH3-N) concentration

NH3N_OUT_MO
Total monthly ammonia-nitrogen (NH3-N) outflow

NH3N_OUTPUT
Ammonia-nitrogen (NH3-N) outflow

NH3N_YR
Mean annual ammonia (NH3-N) concentration

NH3NCODE
NH3-N value qualifier code

NH3NCODE_MO
Monthly ammonia-nitrogen (NH3-N) value qualifier code

NH3NCODE_YR
Annual NH3-N value qualifier code

NO3N
Nitrate-nitrogen (NO3-N), nitrate + nitrite as nitrogen concentration; method: automated cadmium reduction

NO3N_MO
Mean monthly nitrate-nitrogen (NO3-N) concentration

NO3N_OUT_MO
Total monthly nitrate-nitrogen (NO3-N) outflow

NO3N_OUTPUT
Nitrate-nitrogen (NO3-N) outflow

NO3N_YR
Mean annual nitrate-nitrogen (NO3-N) concentration

NO3NCODE
NO3-N value qualifier code

NO3NCODE_MO
Monthly nitrate-nitrogen (NO3-N) value qualifier code

NO3NCODE_YR

Annual NO3-N value qualifier code

PARTN

Particulate N, also known as total suspended nitrogen - not measured analytically; mathematically determined by subtraction of Total dissolved nitrogen (TDN) from Unfiltered Total nitrogen (UTN). Values before May 2005 are determined by UTKN minus TKN.

PARTN_MO

Mean monthly particulate N concentration - not measured analytically; mathematically determined by subtraction of Total dissolved nitrogen (TDN) from Unfiltered Total nitrogen (UTN). Values before May 2005 are determined by UTKN minus TKN.

PARTN_OUT_MO

Total monthly particulate N outflow - not measured analytically; mathematically determined by subtraction of Total dissolved nitrogen (TDN) from Unfiltered Total nitrogen (UTN). Values before May 2005 are determined by UTKN minus TKN.

PARTN_OUTPUT

Particulate N outflow - not measured analytically; mathematically determined by subtraction of Total dissolved nitrogen (TDN) from Unfiltered Total nitrogen (UTN). Values before May 2005 are determined by UTKN minus TKN.

PARTN_YR

Mean annual particulate N concentration - not measured analytically; mathematically determined by subtraction of Total dissolved nitrogen (TDN) from Unfiltered Total nitrogen (UTN). Values before May 2005 are determined by UTKN minus TKN.

PARTNCODE

Particulate N value qualifier code

PARTNCODE_MO

Monthly particulate N value qualifier code

PARTNCODE_YR

Annual particulate N value qualifier code

PARTP

Particulate P, also known as total suspended phosphorus - not measured analytically; mathematically determined by subtraction of Total Dissolved P (TDP) from Unfiltered Total P (UTP)

PARTP_MO

Mean monthly particulate P - not measured analytically; mathematically determined by subtraction of Total Dissolved P (TDP) from Unfiltered Total P (UTP)

PARTP_OUT_MO

Total monthly particulate P outflow - not measured analytically; mathematically determined by subtraction of Total Dissolved P (TDP) from Unfiltered Total P (UTP)

PARTP_OUTPUT

Particulate P outflow - not measured analytically; mathematically determined by subtraction of Total Dissolved P (TDP) from Unfiltered Total P (UTP)

PARTP_YR

Mean annual particulate P - not measured analytically; mathematically determined by subtraction of Total Dissolved P (TDP) from Unfiltered Total P (UTP)

PARTPCODE

Particulate P value qualifier code

PARTPCODE_MO
Monthly particulate P value qualifier code
PARTPCODE_YR

Annual particulate P value qualifier code
PH

pH (hydrogen concentration); method: glass electrode
PH_MO

Mean monthly pH
PH_YR

Mean annual pH
PHCODE

pH value qualifier code
PHCODE_MO

Monthly pH value qualifier code
PHCODE_YR

Annual pH value qualifier code
PO4P

Ortho phosphorus concentration, soluble reactive phosphorus, phosphate (PO4-P); method: ascorbic acid finish
PO4P_MO

Mean monthly ortho phosphorus (PO4-P) concentration
PO4P_OUT_MO

Total monthly ortho phosphorus (PO4-P) outflow
PO4P_OUTPUT

Ortho phosphorus (PO4-P) outflow
PO4P_YR

Mean annual ortho phosphorus (PO4-P) concentration
PO4PCODE

Ortho phosphorus value qualifier code
PO4PCODE_MO

Monthly ortho phosphorus (PO4-P) value qualifier code
PO4PCODE_YR

Annual ortho phosphorus value qualifier code
PVOL

Sample volume from streamflow proportional sampler
PVOLCODE

Sample volume code
Q_AREA_CM

Streamflow in cm for the time interval represented by the proportional sample
Q_AREA_MO
  Total monthly streamflow over watershed area

Q_AREA_YR
  Total annual streamflow for the wateryear

QA_SAMPLE
  Quality assurance sample number assigned if sample water is further analyzed for internal laboratory purposes

QCCODE
  Quality control sample codes are assigned to samples collected for examining integrity of proportional sample analysis

QCODE
  Streamflow value qualifier code

QCODE_MO
  Monthly streamflow value qualifier code

QCODE_YR
  Annual streamflow value qualifier code

SAMPLER_TYPE
  Type of water sampler or method used to collect water

SEQ_INDEX
  Sequential index generated primarily by the temporal order in which samples are collected

SI
  Silica as silicon concentration; method: automated molybdenum blue

SI_MO
  Mean monthly silica concentration

SI_OUT_MO
  Total monthly silica outflow

SI_OUTPUT
  Silica outflow

SI_YR
  Mean annual silica concentration

SICODE
  Silica value qualifier code

SICODE_MO
  Monthly silica value qualifier code

SICODE_YR
  Annual silica value qualifier code

SITECODE
  Gaging station site code

SO4S
SO4-S (dissolved) concentration, sulfate as sulfur; method ion chromatography (automated barium sulfate before 1993)

SO4S_MO
Mean monthly sulfate-sulfur (SO4-S) concentration

SO4S_OUT_MO
Total monthly sulfate-sulfur (SO4-S) outflow

SO4S_OUTPUT
SO4-S (sulfate-sulfur) outflow

SO4S_YR
Mean annual SO4-S (sulfate-sulfur) concentration

SO4SCODE
SO4-S value qualifier code

SO4SCODE_MO
Monthly sulfate-sulfur (SO4-S) value qualifier code

SO4SCODE_YR
Annual SO4-S value qualifier code

SSED
Suspended sediment concentration; method: nonfiltrable residue, gravimetric

SSED_MO
Mean monthly suspended sediment concentration

SSED_OUT_MO
Total monthly suspended sediment outflow

SSED_OUTPUT
Suspended sediment outflow

SSED_YR
Mean annual suspended sediment concentration

SSEDCODE
Suspended sediment value qualifier code

SSEDCODE_MO
Monthly suspended sediment value qualifier code

SSEDCODE_YR
Annual suspended sediment value qualifier code

STCODE
Study code

TDN
Total dissolved nitrogen concentration (filtered sample); method: persulfate digestion and analysis by automated colorimetric analysis; instrument: Technicon Auto-Analyzer II

TDN_MO
Mean monthly total dissolved nitrogen concentration
TDN_OUT_MO
  Total monthly total dissolved nitrogen outflow (filtered sample)

TDN_OUTPUT
  Total dissolved nitrogen outflow (filtered sample)

TDN_YR
  Mean annual total dissolved nitrogen concentration

TDNCODE
  Total dissolved nitrogen value qualifier code

TDNCODE_MO
  Monthly total dissolved nitrogen value qualifier code

TDNCODE_YR
  Annual total dissolved nitrogen value qualifier code

TDP
  Total dissolved phosphorus concentration; method: persulfate/H2SO4 digestion, ascorbic acid finish

TDP_MO
  Mean monthly total dissolved phosphorus concentration

TDP_OUT_MO
  Total monthly total dissolved phosphorus outflow

TDP_OUTPUT
  Total dissolved phosphorus outflow

TDP_YR
  Mean annual total dissolved phosphorus concentration

TDPCODE
  Total dissolved phosphorus value qualifier code

TDPCODE_MO
  Monthly total dissolved phosphorus value qualifier code

TDPCODE_YR
  Annual total dissolved phosphorus value qualifier code

TKN
  Total Kjeldahl nitrogen concentration on filtered sample (dissolved); method: Kjeldahl digestion H2SO4, CuSO4/KCl, nessler finish

TKN_MO
  Mean monthly total kjeldahl nitrogen concentration (dissolved)

TKN_OUT_MO
  Total monthly total Kjeldahl nitrogen (dissolved) outflow

TKN_OUTPUT
  Total Kjeldahl nitrogen (dissolved) outflow

TKN_YR
  Mean annual total Kjeldahl nitrogen (dissolved) concentration
Mean annual total kjeldahl nitrogen concentration (dissolved)

TKNCODE
  Total Kjeldahl nitrogen value qualifier code

TKNCODE_MO
  Monthly total Kjeldahl nitrogen (dissolved) value qualifier code

TKNCODE_YR
  Annual total Kjeldahl nitrogen value qualifier code

TYPE
  Sample type indicator

UTKN
  Total Kjeldahl nitrogen concentration on unfiltered sample; method: Kjeldahl digestion H2SO4, CuSO4/KCl, nessler finish

UTKN_MO
  Mean monthly unfiltered total Kjeldahl nitrogen concentration

UTKN_OUT_MO
  Total monthly unfiltered total Kjeldahl nitrogen outflow

UTKN_OUTPUT
  Unfiltered total Kjeldahl nitrogen outflow

UTKN_YR
  Mean annual unfiltered total Kjeldahl nitrogen concentration

UTKNCODE
  Unfiltered total Kjeldahl nitrogen value qualifier code

UTKNCODE_MO
  Monthly unfiltered total Kjeldahl nitrogen value qualifier code

UTKNCODE_YR
  Annual unfiltered total Kjeldahl nitrogen value qualifier code

UTN
  Total nitrogen concentration (unfiltered sample); method: persulfate digestion and analysis by automated colorimetric analysis; instrument: Technicon Auto-Analyzer II

UTN_MO
  Mean monthly total nitrogen concentration (unfiltered samples)

UTN_OUT_MO
  Total monthly total nitrogen outflow (unfiltered sample)

UTN_OUTPUT
  Total nitrogen outflow (unfiltered sample)

UTN_YR
  Mean annual total nitrogen concentration (unfiltered samples)

UTNCODE
  Unfiltered total nitrogen value qualifier code
UTNCODE_MO
   Monthly unfiltered total nitrogen value qualifier code

UTNCODE_YR
   Annual unfiltered total nitrogen value qualifier code

UTP
   Unfiltered total phosphorus concentration; method: persulfate/H2SO4 digestion, ascorbic acid finish

UTP_MO
   Mean monthly unfiltered total phosphorus concentration

UTP_OUT_MO
   Total monthly unfiltered total phosphorus outflow

UTP_OUTPUT
   Unfiltered total phosphorus outflow

UTP_YR
   Mean annual unfiltered total phosphorus concentration

UTPCODE
   Unfiltered total phosphorus value qualifier code

UTPCODE_MO
   Monthly unfiltered total phosphorus value qualifier code

UTPCODE_YR
   Annual unfiltered total phosphorus value qualifier code

WATERYEAR
   Water year of sample or annual summary (October-September)

YEAR
   Calendar year of annual or monthly summary

Enumerated Domains:

Enumerated Domain for Attribute: ALKCODE
*   Value is below detection limit for analysis (used beginning in 1991)
A   Accepted value
E   Estimated value
N   No analytical measurement
Q   Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: ANCACODE
D   Derived anion-cation ratio value is based on the full set of anions and cations
N   No anion-cation ratio calculation determined due to missing analytical components
D*  Derived value - mathematically determined from other analytical measurements, one or more of which were below the detection limit
DE  Derived value - mathematically determined from other analytical measurements, one or more of which were estimated values
DQ  Derived value - mathematically determined from other analytical measurements,
one or more of which were questionable values

**Enumerated Domain for Attribute: CACODE**

- Value is below detection limit for analysis (used beginning in 1991)
- A: Accepted value
- E: Estimated value
- N: No analytical measurement
- Q: Value is questionable (used beginning in 1991)

**Enumerated Domain for Attribute: CLCODE**

- Value is below detection limit for analysis (used beginning in 1991)
- A: Accepted value
- E: Estimated value
- N: No analytical measurement
- Q: Value is questionable (used beginning in 1991)
- C: Value confirmed, contamination or experimental tracer suspected (code use begins May 2007)

**Enumerated Domain for Attribute: CONDCODE**

- Value is below detection limit for analysis (used beginning in 1991)
- A: Accepted value
- E: Estimated value
- N: No analytical measurement
- Q: Value is questionable (used beginning in 1991)
- C: Confirmed value, contamination or experimental tracer suspected (code use begins May 2007)

**Enumerated Domain for Attribute: DOCCODE**

- Value is below detection limit for analysis (used beginning in 1991)
- A: Accepted value
- E: Estimated value
- N: No analytical measurement
- Q: Value is questionable (used beginning in 1991)

**Enumerated Domain for Attribute: KCODE**

- Value is below detection limit for analysis (used beginning in 1991)
- A: Accepted value
- E: Estimated value
- N: No analytical measurement
- Q: Value is questionable (used beginning in 1991)

**Enumerated Domain for Attribute: MGCODE**

- Value is below detection limit for analysis (used beginning in 1991)
A    Accepted value
E    Estimated value
N    No analytical measurement
Q    Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: NACODE
*    Value is below detection limit for analysis (used beginning in 1991)
A    Accepted value
E    Estimated value
N    No analytical measurement
Q    Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: NH3NCODE
*    Value is below detection limit for analysis (used beginning in 1991)
A    Accepted value
E    Estimated value
N    No analytical measurement
Q    Value is questionable (used beginning in 1991)
C    Value confirmed, contamination suspected (code use begins May 2007)

Enumerated Domain for Attribute: NO3NCODE
*    Value is below detection limit for analysis (used beginning in 1991)
A    Accepted value
E    Estimated value
N    No analytical measurement
Q    Value is questionable (used beginning in 1991)
C    Value confirmed, contamination suspected (code use begins May 2011)

Enumerated Domain for Attribute: PO4PCODE
*    Value is below detection limit for analysis (used beginning in 1991)
A    Accepted value
E    Estimated value
N    No analytical measurement
Q    Value is questionable (used beginning in 1991)
C    Value confirmed, contamination suspected (code use begins May 2011)

Enumerated Domain for Attribute: DONCODE
N    No derived value is calculated due to missing analytical components
D    Derived value - mathematically determined from other analytical measurements
D* Derived value - mathematically determined from other analytical measurements, one or more of which were below the detection limit

DE Derived value - mathematically determined from other analytical measurements, one or more of which were estimated values

DQ Derived value - mathematically determined from other analytical measurements, one or more of which were questionable values

DC Derived value confirmed, contamination suspected (code use begins May 2007)

Enumerated Domain for Attribute: PHCODE
A Accepted value
E Estimated value
N No analytical measurement
Q Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: PARTNCODE
N No derived value is calculated due to missing analytical components
D Derived value - mathematically determined from other analytical measurements
D* Derived value - mathematically determined from other analytical measurements, one or more of which were below the detection limit
DE Derived value - mathematically determined from other analytical measurements, one or more of which were estimated values
DQ Derived value - mathematically determined from other analytical measurements, one or more of which were questionable values
DC Derived value confirmed, contamination suspected (code use begins May 2007)

Enumerated Domain for Attribute: PARTPCODE
N No derived value is calculated due to missing analytical components
D Derived value - mathematically determined from other analytical measurements
D* Derived value - mathematically determined from other analytical measurements, one or more of which were below the detection limit
DE Derived value - mathematically determined from other analytical measurements, one or more of which were estimated values
DQ Derived value - mathematically determined from other analytical measurements, one or more of which were questionable values
DC Derived value confirmed, contamination suspected (code use begins May 2007)

Enumerated Domain for Attribute: PVOLCODE
A Accepted value for sample volume
E Sample volume value is estimated
Q Sample volume value is questionable - typically implies volume is measured correctly, but volume does not proportionally represent the collection period
N No sample volume value available

Enumerated Domain for Attribute: QCODE
A Accepted value for streamflow
N No streamflow available for period
E Estimated streamflow value
P Provisional streamflow value is likely to change - used for USGS Lookout Creek streamflow
Q Streamflow value for the period is questionable

Enumerated Domain for Attribute: SICODE
* Value is below detection limit for analysis (used beginning in 1991)

C  Sample combined with preceding saved sample(s) for analysis - not used after 1981
G  Grab sample taken in lieu of proportional sample
S  Sample saved to combine with following collection (type 'C') due to insufficient water (not used after 1981). Nutrient concentrations of the following stream water sample are used to determine fluxes for this period.
N  No sample is collected for this period
F  Complete, full sample. Sampler operational throughout sampling period.
YE  Year end marker allows summary by water year - this is not a sample. Flux values are calculated from streamflow ending Sep 30 and use analyte concentrations from the following sample. 'Y' markers are inserted every Sep 30
A  Augmented sample - grab sample added to insufficient proportional sample (rarely used after 1987)
P  Partial sample - proportional sampler did not operate successfully over entire period
B  Biased sample - consecutive samples are proportionally separated and combined based on streamflow - code use begins WY 2008 to approx. two 3-week sampling intervals (where one sample is for 4 wks and the next for 2 wks)

Enumerated Domain for Attribute: STCODE
CF002 Study code CF002

Enumerated Domain for Attribute: TYPE
QB  Quality control samples taken below turbulence box
QS  Quality control sample taken through sampler
QL  Quality control sample taken through sampler and left in gage house until next collection
QA  Quality control sample taken above flume
C  Sample combined with preceding saved sample(s) for analysis - not used after 1981
G  Grab sample taken in lieu of proportional sample
S  Sample saved to combine with following collection (type 'C') due to insufficient water (not used after 1981). Nutrient concentrations of the following stream water sample are used to determine fluxes for this period.
N  No sample is collected for this period
F  Complete, full sample. Sampler operational throughout sampling period.
YE Year end marker allows summary by water year - this is not a sample. Flux values are calculated from streamflow ending Sep 30 and use analyte concentrations from the following sample. 'Y' markers are inserted every Sep30
A Augmented sample - grab sample added to insufficient proportional sample (rarely used after 1987)
P Partial sample - proportional sampler did not operate successfully over entire period
B Biased sample - consecutive samples are proportionally separated and combined based on streamflow - code use begins WY 2008 to approx. two 3-week sampling intervals (where one sample is for 4 wks and the next for 2 wks)

I  Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
N  No analyses conducted for proportional samples taken during the month
E  Monthly value includes estimated values

Enumerated Domain for Attribute: DOCCODE_MO
A  Accepted monthly value
I  Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
N  No analyses conducted for proportional samples taken during the month
Q Monthly value includes questionable sample values
E Monthly value includes estimated values

Enumerated Domain for Attribute: DONCODE_MO
D Monthly value based on derived values
D* Monthly value based on derived values; one or more values measured below the detection limit
DE Monthly value based on derived values; one or more values estimated
DQ Monthly value based on derived values; one or more values questionable
DQ* Monthly value based on derived values; one or more values questionable; one or more values measured below the detection limit
ID Monthly value incomplete - only 6-25 days are proportionally sampled in the month; monthly value based on derived values
ID* Monthly value incomplete - only 6-25 days are proportionally sampled in the month; monthly value based on derived values of which one or more values measured below the detection limit
N No analyses conducted for proportional samples taken during the month
DE* Monthly value based on derived values; one or more values estimated

Enumerated Domain for Attribute: KCODE_MO
A Accepted monthly value
E Monthly value includes estimated values
I Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
N No analyses conducted for proportional samples taken during the month
Q Monthly value includes questionable sample values

Enumerated Domain for Attribute: MGCODE_MO
A Accepted monthly value
E Monthly value includes estimated values
I Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
N No analyses conducted for proportional samples taken during the month
Q Monthly value includes questionable sample values

Enumerated Domain for Attribute: NACODE_MO
A Accepted monthly value
E Monthly value includes estimated values
I Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
N No analyses conducted for proportional samples taken during the month
Q Monthly value includes questionable sample values

Enumerated Domain for Attribute: NH3NCODE_MO
A Accepted monthly value
* Monthly value includes one or more values measured below the detection limit
E Monthly value includes estimated values
I Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
N No analyses conducted for proportional samples taken during the month
Q* Monthly value includes questionable sample values
I* Monthly value incomplete - only 6-25 days are proportionally sampled in the month; one or more values measured below the detection limit
E* Monthly value includes estimated values; one or more values measured below the detection limit

Enumerated Domain for Attribute: NO3NCODE_MO
A Accepted monthly value
* Monthly value includes one or more values measured below the detection limit
E Monthly value includes estimated values
I Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
N No analyses conducted for proportional samples taken during the month
Q Monthly value includes questionable sample values
Q* Monthly value includes questionable sample values
I* Monthly value incomplete - only 6-25 days are proportionally sampled in the month; one or more values measured below the detection limit
E* Monthly value includes estimated values; one or more values measured below the detection limit

Enumerated Domain for Attribute: PARTNCODE_MO
D Monthly value based on derived values
D* Monthly value based on derived values; one or more values measured below the detection limit
DE Monthly value based on derived values; one or more values estimated
DQ Monthly value based on derived values; one or more values questionable
ID Monthly value incomplete - only 6-25 days are proportionally sampled in the month; monthly value based on derived values
N No analyses conducted for proportional samples taken during the month
DQ* Monthly value based on derived values; one or more values measured below the detection limit; one or more values questionable
ID* Monthly value incomplete - only 6-25 days are proportionally sampled in the month; monthly value based on derived values; one or more values measured below the detection limit
DE* Monthly value incomplete - only 6-25 days are proportionally sampled in the month; monthly value based on derived values; one or more values estimated

Enumerated Domain for Attribute: PARTPCODE_MO
D Monthly value based on derived values
DE Monthly value based on derived values; one or more values estimated
DQ Monthly value based on derived values; one or more values questionable
ID Monthly value incomplete - only 6-25 days are proportionally sampled in the month; monthly value based on derived values
IDE Monthly value incomplete - only 6-25 days are proportionally sampled in the month; monthly value based on derived values of which one or more values are estimated
N No analyses conducted for proportional samples taken during the month

Enumerated Domain for Attribute: PO4PCODE_MO
A Accepted monthly value  
* Monthly value includes one or more values measured below the detection limit  
E Monthly value includes estimated values  
I Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary  
N No analyses conducted for proportional samples taken during the month  
Q Monthly value includes questionable sample values  

Enumerated Domain for Attribute: OCODE_MO  
A Accepted monthly value  
E Monthly value includes estimated values  
I Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary  
N No analyses conducted for proportional samples taken during the month  
Q Monthly value includes questionable sample values  
P Monthly value includes provisional values subject to change  

Enumerated Domain for Attribute: SICODE_MO  
A Accepted monthly value  
I Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary  
N No analyses conducted for proportional samples taken during the month  
Q Monthly value includes questionable sample values  
IQ Monthly value incomplete - only 6-25 days are proportionally sampled in the month; one or more values questionable  
E Monthly value includes estimated values  
EQ Monthly value includes estimated values; one or more values were questionable  

Enumerated Domain for Attribute: SO4SCODE_MO  
A Accepted monthly value  
E Monthly value includes estimated values  
I Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary  
N No analyses conducted for proportional samples taken during the month  

Enumerated Domain for Attribute: SSEDCODE_MO  
A Accepted monthly value  
E Monthly value includes estimated values  
I Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary  
N No analyses conducted for proportional samples taken during the month  
Q Monthly value includes questionable sample values  

Enumerated Domain for Attribute: TDNCODE_MO  
* Monthly value includes one or more values measured below the detection limit
D Monthly value based on derived values
D* Monthly value based on derived values; one or more values measured below the detection limit
DE Monthly value based on derived values; one or more values estimated
DQ Monthly value based on derived values; one or more values questionable
DQ* Monthly value based on derived values; one or more values questionable; one or more values measured below the detection limit
I Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
ID Monthly value incomplete - only 6-25 days are proportionally sampled in the month; monthly value based on derived values
ID* Monthly value incomplete - only 6-25 days are proportionally sampled in the month; monthly value based on derived values of which one or more values are questionable
IDE Monthly value incomplete - only 6-25 days are proportionally sampled in the month; monthly value based on derived values of which one or more values are estimated
N No analyses conducted for proportional samples taken during the month
Q Monthly value includes questionable sample values
E Monthly value includes estimated values
DE* Monthly value based on derived values; one or more values estimated
Q* Monthly value includes questionable sample values; one or more values measured below the detection limit
A Accepted monthly value
I* Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary; one or more values measured below the detection limit
E* One or more values estimated; one or more values measured below the detection limit

Enumerated Domain for Attribute: TDPCODE_MO
A Accepted monthly value
E Monthly value includes estimated values
I Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
N No analyses conducted for proportional samples taken during the month
Q Monthly value includes questionable sample values

Enumerated Domain for Attribute: TKNCODE_MO
A Accepted monthly value
* Monthly value includes one or more values measured below the detection limit
E Monthly value includes estimated values
I Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
N No analyses conducted for proportional samples taken during the month
Q Monthly value includes questionable sample values

Enumerated Domain for Attribute: UTKNCODE_MO
A Accepted monthly value
* Monthly value includes one or more values measured below the detection limit
E Monthly value includes estimated values
I Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
N No analyses conducted for proportional samples taken during the month
Q Monthly value includes questionable sample values

Enumerated Domain for Attribute: UTNCODE_MO
* Monthly value includes one or more values measured below the detection limit
D Monthly value based on derived values
D* Monthly value based on derived values; one or more values measured below the detection limit
DE Monthly value based on derived values; one or more values estimated
DQ Monthly value based on derived values; one or more values questionable
DQ* Monthly value based on derived values; one or more values questionable; one or more values measured below the detection limit
I Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
ID Monthly value incomplete - only 6-25 days are proportionally sampled in the month; monthly value based on derived values
ID* Monthly value incomplete - only 6-25 days are proportionally sampled in the month; monthly value based on derived values of which one or more values measured below the detection limit
IDE Monthly value incomplete - only 6-25 days are proportionally sampled in the month; monthly value based on derived values of which one or more values are estimated
N No analyses conducted for proportional samples taken during the month
Q Monthly value includes questionable sample values

Enumerated Domain for Attribute: UTPCODE_MO
A Accepted monthly value
E Monthly value includes estimated values
DE* Monthly value based on derived values; one or more values estimated; one or more values measured below the detection limit
Q* Monthly value includes questionable sample values; one or more values measured below the detection limit
A Accepted monthly value
I* Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary; one or more values measured below the detection limit
E* One or more values estimated; one or more values measured below the detection limit

Enumerated Domain for Attribute: ALKCODE
* Value is below detection limit for analysis (used beginning in 1991)
A Accepted value
E Estimated value
N No analytical measurement
Q Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: CACODE
* Value is below detection limit for analysis (used beginning in 1991)
A Accepted value
E Estimated value
N No analytical measurement
Q Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: CLCODE
* Value is below detection limit for analysis (used beginning in 1991)
A Accepted value
E Estimated value
N No analytical measurement
Q Value is questionable (used beginning in 1991)
C Value confirmed, contamination or experimental tracer suspected (code use begins May 2007)

Enumerated Domain for Attribute: DOCCODE
* Value is below detection limit for analysis (used beginning in 1991)
A Accepted value
E Estimated value
N No analytical measurement
Q Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: KCODE
* Value is below detection limit for analysis (used beginning in 1991)
A Accepted value
E Estimated value
N No analytical measurement
Q Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: MGCODE
* Value is below detection limit for analysis (used beginning in 1991)
A Accepted value
E Estimated value
N No analytical measurement
Q Value is questionable (used beginning in 1991)
Enumerated Domain for Attribute: NACODE
* Value is below detection limit for analysis (used beginning in 1991)
A Accepted value
E Estimated value
N No analytical measurement
Q Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: NH3NCODE
* Value is below detection limit for analysis (used beginning in 1991)
A Accepted value
E Estimated value
N No analytical measurement
Q Value is questionable (used beginning in 1991)
C Value confirmed, contamination suspected (code use begins May 2007)

Enumerated Domain for Attribute: NO3NCODE
* Value is below detection limit for analysis (used beginning in 1991)
A Accepted value
E Estimated value
N No analytical measurement
Q Value is questionable (used beginning in 1991)
C Value confirmed, contamination suspected (code use begins May 2011)

Enumerated Domain for Attribute: PO4PCODE
* Value is below detection limit for analysis (used beginning in 1991)
A Accepted value
E Estimated value
N No analytical measurement
Q Value is questionable (used beginning in 1991)
C Value confirmed, contamination suspected (code use begins May 2011)

Enumerated Domain for Attribute: DONCODE
N No derived value is calculated due to missing analytical components
D Derived value - mathematically determined from other analytical measurements
D* Derived value - mathematically determined from other analytical measurements, one or more of which were below the detection limit
DE Derived value - mathematically determined from other analytical measurements, one or more of which were estimated values
DQ Derived value - mathematically determined from other analytical measurements, one or more of which were questionable values
DC Derived value confirmed, contamination suspected (code use begins May 2007)
Enumerated Domain for Attribute: PARTNCODE

N  No derived value is calculated due to missing analytical components
D  Derived value - mathematically determined from other analytical measurements
D* Derived value - mathematically determined from other analytical measurements, one or more of which were below the detection limit
DE Derived value - mathematically determined from other analytical measurements, one or more of which were estimated values
DQ Derived value - mathematically determined from other analytical measurements, one or more of which were questionable values
DC Derived value confirmed, contamination suspected (code use begins May 2007)

Enumerated Domain for Attribute: PARTPCODE

N  No derived value is calculated due to missing analytical components
D  Derived value - mathematically determined from other analytical measurements
D* Derived value - mathematically determined from other analytical measurements, one or more of which were below the detection limit
DE Derived value - mathematically determined from other analytical measurements, one or more of which were estimated values
DQ Derived value - mathematically determined from other analytical measurements, one or more of which were questionable values

Enumerated Domain for Attribute: QCODE

A  Accepted value for streamflow
N  No streamflow available for period
E  Estimated streamflow value
P  Provisional streamflow value is likely to change - used for USGS Lookout Creek streamflow
Q  Streamflow value for the period is questionable

Enumerated Domain for Attribute: SICODE

* Value is below detection limit for analysis (used beginning in 1991)
A  Accepted value
E  Estimated value
N  No analytical measurement
Q  Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: SO4SCODE

* Value is below detection limit for analysis (used beginning in 1991)
A  Accepted value
E  Estimated value
N  No analytical measurement
Q  Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: SSEDCODE

A  Accepted value
E  Estimated value
N  No analytical measurement
Q Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: STCODE
CF002 Study code CF002

Enumerated Domain for Attribute: TKNCODE
A Value is below detection limit for analysis (used beginning in 1991)
E Accepted value
N Estimated value
Q No analytical measurement

Enumerated Domain for Attribute: TDPCODE
A Value is below detection limit for analysis (used beginning in 1991)
E Accepted value
N Estimated value
Q No analytical measurement
C Value confirmed, contamination suspected (code use begins May 2011)

Enumerated Domain for Attribute: TYPE
QB Quality control samples taken below turbulence box
QS Quality control sample taken through sampler
QL Quality control sample taken through sampler and left in gage house until next collection
QA Quality control sample taken above flume
C Sample combined with preceding saved sample(s) for analysis - not used after 1981
G Grab sample taken in lieu of proportional sample
S Sample saved to combine with following collection (type 'C') due to insufficient water (not used after 1981). Nutrient concentrations of the following stream water sample are used to determine fluxes for this period.
N No sample is collected for this period
F Complete, full sample. Sampler operational throughout sampling period.
YE Year end marker allows summary by water year - this is not a sample. Flux values are calculated from streamflow ending Sep 30 and use analyte concentrations from the following sample. "Y" markers are inserted every Sep30
A Augmented sample - grab sample added to insufficient proportional sample (rarely used after 1987)
P Partial sample - proportional sampler did not operate successfully over entire period
B Biased sample - consecutive samples are proportionally separated and combined based on streamflow - code use begins WY 2008 to approx. two 3-week sampling intervals (where one sample is for 4 wks and the next for 2 wks)
