**Title:** Stream chemistry concentrations and fluxes using proportional sampling in the Andrews Experimental Forest, 1968 to present

**Abstract:**
Stream chemistry sampling and analysis was initiated at the H.J. Andrews Experimental Forest in 1968 in two small watersheds (Watersheds 9,10). Sampling has expanded as additional paired watershed studies (Watersheds 1, 2, 6, 7, 8) and monitoring (Mack, Lookout Cr) were initiated over time. Water samples are collected proportionally to streamflow as a function of stage height and composited at each stream gauging site. Composite sample periods are generally three weeks and 3 one-week samples are commonly composited in the lab before analysis. Water samples are analyzed at the Cooperative Chemical Analytical Lab (CCAL) (http://www.ccal.oregonstate.edu/). Concentrations of analytes include dissolved and particulate nitrogen, phosphorus, carbon, as well pH, conductivity, suspended sediment, and full suite of cations and anions. Monthly and annual mean concentrations are calculated by weighting 3-week periods by streamflow. Fluxes are calculated using concentrations and flow. The original objective was to examine the nutrient budgets for small watersheds and to evaluate changes in average concentrations and fluxes following timber harvest in comparison with unharvested reference watersheds. This study is conducted in conjunction with Andrew's precipitation chemistry (CP002) and the U.S. National Atmospheric Deposition Program (NADP).

**Keywords:** Discharge; Dissolved load; Hydrology/Water; Logging; Long-Term Ecological Research (LTER); Nutrients; Solution transport; Streamflow; Timber harvesting; Water; Water chemistry; Inorganic nutrients; Long-Term Ecological Research (LTER); Hydrology; Water chemistry; suspended solids; discharge; streamflow; timber harvest; inorganic nutrients; nutrients; dissolved nutrients; water;

**Date data commenced:** 1968-10-02

**Date data terminated:** 2016-05-04

**Principal Investigator:** Sherri L. Johnson

**List of Entities:**
1. Proportional stream water sample nutrient concentrations
2. Stream water nutrient mean monthly concentrations
3. Stream water nutrient mean annual concentrations
4. Stream water nutrient monthly outflow (kg/ha)
5. Stream water nutrient outflow (kg/ha) for each proportional sampling interval
6. Stream water sample log sheet: field and laboratory comments

### 1. Proportional stream water sample nutrient concentrations

This is the raw proportional sample concentration data collected periodically (usually every three weeks). Please see mean monthly concentration data provided in entity 2.

Stream water nutrient outflow (kg/ha) for each proportional sampling interval

Data are calculated outflow fluxes for each proportional sample period. Alternatively, please consider use of monthly outflow fluxes provided in entity 4.

### Attributes Definitions:

**ALK**

Alkalinity as calcium carbonate (CaCO3); method: electrometric titration to pH 4.5; all data is converted from the formerly used units of bicarbonate carbon (HCO3-C)

**ALK_MO**

Mean monthly alkalinity concentration as CaCO3 (calcium carbonate)

**ALK_OUT_MO**

Total monthly alkalinity outflow as CaCO3 (calcium carbonate). All units are now converted from HCO3-C (bi-carbonate)

**ALK_OUTPUT**

Alkalinity outflow as CaCO3 (calcium carbonate)

**ALK_YR**

Mean annual alkalinity concentration as CaCO3 (calcium carbonate). All units are now converted from HCO3-C (bi-carbonate)

**ALKCODE**

Alkalinity value qualifier code
ALKCODE_MO
  Monthly alkalinity qualifier value code

ALKCODE_YR
  Annual alkalinity qualifier value code

ANCA
  Anion-cation ratio: micro equivalence ratio of anions to cations by calculation - provided only as an analytical check. Requires anions: ALK, SO4S, CL, NO3N, PO4P, cations: pH, Na, K, Ca, Mg, NH4N

ANCACODE
  Anion-cation ratio qualifier code

CA
  Ca, dissolved calcium (filtrable) concentration; method flame atomic absorption spectroscopy

CA_MO
  Mean monthly calcium concentration

CA_OUT_MO
  Total monthly calcium outflow

CA_OUTPUT
  Calcium outflow

CA_YR
  Mean annual calcium concentration

CACODE
  Ca value qualifier code

CACODE_MO
  Monthly calcium value qualifier code

CACODE_YR
  Annual Ca value qualifier code

CL
  Chloride (dissolved) concentration; method: ion chromatography (automated ferric thiocyanate before 1993)

CL_MO
  Mean monthly chloride concentration

CL_OUT_MO
  Total monthly chloride outflow

CL_OUTPUT
  Chloride outflow

CL_YR
  Mean annual chloride concentration

CLCODE
  Cl value qualifier code

CLCODE_MO
Monthly chloride value qualifier code

CLCODE_YR

Annual Cl value qualifier code

COND

Specific conductance; method: wheatstone bridge

COND_MO

Mean monthly specific conductivity concentration

COND_YR

Mean annual specific conductivity concentration

CONDCODE

Conductivity value qualifier code

CONDCODE_MO

Monthly conductivity value qualifier code

CONDCODE_YR

Annual conductivity value qualifier code

DATE_TIME

Collection date and time (PST) of the stream water sample - sample collected proportionally to streamflow from the previous sample date and time. Assume beginning date of first sample period for each collector is October 1st.

DOC

DOC, dissolved organic carbon concentration; method: combustion

DOC_MO

Mean monthly dissolved organic carbon concentration

DOC_OUT_MO

Total monthly dissolved organic carbon outflow

DOC_OUTPUT

Dissolved organic carbon outflow

DOC_YR

Mean annual dissolved organic carbon concentration

DOCCODE

DOC value qualifier code

DOCCODE_MO

Monthly dissolved organic carbon value qualifier code

DOCCODE_YR

Annual DOC value qualifier code

DON

Dissolved organic nitrogen - not measured analytically; mathematically determined by subtracting NH3-N and NO3-N from Total dissolved nitrogen. Values before May 2005 are determined by TKN minus NH3-N.

DON_MO
Mean monthly dissolved organic N concentration - not measured analytically; mathematically determined by subtracting NH3-N and NO3-N from Total dissolved nitrogen. Values before May 2005 are determined by TKN minus NH3-N

DON_OUT_MO
Total monthly dissolved organic N outflow - not measured analytically; mathematically determined by subtracting NH3-N and NO3-N from Total dissolved nitrogen. Values before May 2005 are determined by TKN minus NH3-N

DON_OUTPUT
Dissolved organic N outflow - not measured analytically; mathematically determined by subtracting NH3-N and NO3-N from Total dissolved nitrogen. Values before May 2005 are determined by TKN minus NH3-N

DON_YR
Mean annual dissolved organic N concentration - not measured analytically; mathematically determined by subtracting NH3-N and NO3-N from Total dissolved nitrogen. Values before May 2005 are determined by TKN minus NH3-N

DONCODE
Dissolved organic nitrogen value qualifier code

DONCODE_MO
Monthly dissolved organic N value qualifier code

DONCODE_YR
Annual dissolved organic N value qualifier code

ENTITY
Entity number

FIELD_COMMENTS
Field comments related to the collection of the water sample

K
K, dissolved potassium (filtrable) concentration; method flame atomic absorption spectroscopy

K_MO
Mean monthly potassium concentration

K_OUT_MO
Total monthly potassium outflow

K_OUTPUT
Potassium outflow

K_YR
Mean annual potassium concentration

KCODE
K value qualifier code

KCODE_MO
Monthly potassium value qualifier code

KCODE_YR
Annual K value qualifier code

LAB_COMMENTS
Laboratory comments related to the handling and analyses of the sample
LABNO
  Lab number code for sample

LOW_VOLUME
  Indicator of a low volume sampler that may restrict the breadth of laboratory analyses

MG
  Mg, dissolved magnesium (filtrable) concentration; method flame atomic absorption spectroscopy

MG_MO
  Mean monthly magnesium concentration

MG_OUT_MO
  Total monthly magnesium outflow

MG_OUTPUT
  Magnesium outflow

MG_YR
  Mean annual magnesium concentration

MGCODE
  Mg value qualifier code

MGCODE_MO
  Monthly magnesium value qualifier code

MGCODE_YR
  Annual Mg value qualifier code

MONTH
  Month of summary

NA
  Na, dissolved sodium (filtrable) concentration; method flame atomic absorption spectroscopy

NA_MO
  Mean monthly sodium concentration

NA_OUT_MO
  Total monthly sodium outflow

NA_OUTPUT
  Sodium outflow

NA_YR
  Mean annual sodium concentration

NACODE
  Na value qualifier code

NACODE_MO
  Monthly sodium value qualifier code

NACODE_YR
Annual Na value qualifier code

NH3N
Ammonia-nitrogen (NH3-N) concentration, ammonia as nitrogen; method: automated phenate

NH3N_MO
Mean monthly ammonia-nitrogen (NH3-N) concentration

NH3N_OUT_MO
Total monthly ammonia-nitrogen (NH3-N) outflow

NH3N_OUTPUT
Ammonia-nitrogen (NH3-N) outflow

NH3N_YR
Mean annual ammonia (NH3-N) concentration

NH3NCODE
NH3-N value qualifier code

NH3NCODE_MO
Monthly ammonia-nitrogen (NH3-N) value qualifier code

NH3NCODE_YR
Annual NH3-N value qualifier code

NO3N
Nitrate-nitrogen (NO3-N), nitrate + nitrite as nitrogen concentration; method: automated cadmium reduction

NO3N_MO
Mean monthly nitrate-nitrogen (NO3-N) concentration

NO3N_OUT_MO
Total monthly nitrate-nitrogen (NO3-N) outflow

NO3N_OUTPUT
Nitrate-nitrogen (NO3-N) outflow

NO3N_YR
Mean annual nitrate-nitrogen (NO3-N) concentration

NO3NCODE
NO3-N value qualifier code

NO3NCODE_MO
Monthly nitrate-nitrogen (NO3-N) value qualifier code

NO3NCODE_YR
Annual NO3-N value qualifier code

PARTN
Particulate N, also known as total suspended nitrogen - not measured analytically; mathematically determined by subtraction of Total dissolved nitrogen (TDN) from Unfiltered Total nitrogen (UTN). Values before May 2005 are determined by UTKN minus TKN.

PARTN_MO
Mean monthly particulate N concentration - not measured analytically; mathematically determined by subtraction of Total dissolved
nitrogen (TDN) from Unfiltered Total nitrogen (UTN). Values before May 2005 are determined by UTKN minus TKN.

PARTN_OUT_MO
Total monthly particulate N outflow - not measured analytically; mathematically determined by subtraction of Total dissolved nitrogen (TDN) from Unfiltered Total nitrogen (UTN). Values before May 2005 are determined by UTKN minus TKN.

PARTN_OUTPUT
Particulate N outflow - not measured analytically; mathematically determined by subtraction of Total dissolved nitrogen (TDN) from Unfiltered Total nitrogen (UTN). Values before May 2005 are determined by UTKN minus TKN.

PARTN_YR
Mean annual particulate N concentration - not measured analytically; mathematically determined by subtraction of Total dissolved nitrogen (TDN) from Unfiltered Total nitrogen (UTN). Values before May 2005 are determined by UTKN minus TKN.

PARTNCODE
Particulate N value qualifier code

PARTNCODE_MO
Monthly particulate N value qualifier code

PARTNCODE_YR
Annual particulate N value qualifier code

PARTP
Particulate P, also known as total suspended phosphorus - not measured analytically; mathematically determined by subtraction of Total Dissolved P (TDP) from Unfiltered Total P (UTP)

PARTP_MO
Mean monthly particulate P - not measured analytically; mathematically determined by subtraction of Total Dissolved P (TDP) from Unfiltered Total P (UTP)

PARTP_OUT_MO
Total monthly particulate P outflow - not measured analytically; mathematically determined by subtraction of Total Dissolved P (TDP) from Unfiltered Total P (UTP)

PARTP_OUTPUT
Particulate P outflow - not measured analytically; mathematically determined by subtraction of Total Dissolved P (TDP) from Unfiltered Total P (UTP)

PARTP_YR
Mean annual particulate P - not measured analytically; mathematically determined by subtraction of Total Dissolved P (TDP) from Unfiltered Total P (UTP)

PARTPCODE
Particulate P value qualifier code

PARTPCODE_MO
Monthly particulate P value qualifier code

PARTPCODE_YR
Annual particulate P value qualifier code

PH
pH (hydrogen concentration); method: glass electrode

PH_MO
Mean monthly pH
PH_YR
  Mean annual pH

PHCODE
  pH value qualifier code

PHCODE_MO
  Monthly pH value qualifier code

PHCODE_YR
  Annual pH value qualifier code

PO4P
  Ortho phosphorus concentration, soluble reactive phosphorus, phosphate (PO4-P); method: ascorbic acid finish

PO4P_MO
  Mean monthly ortho phosphorus (PO4-P) concentration

PO4P_OUT_MO
  Total monthly ortho phosphorus (PO4-P) outflow

PO4P_OUTPUT
  Ortho phosphorus (PO4-P) outflow

PO4P_YR
  Mean annual ortho phosphorus (PO4-P) concentration

PO4PCODE
  Ortho phosphorus value qualifier code

PO4PCODE_MO
  Monthly ortho phosphorus (PO4-P) value qualifier code

PO4PCODE_YR
  Annual ortho phosphorus value qualifier code

PVOL
  Sample volume from streamflow proportional sampler

PVOLCODE
  Sample volume code

Q_AREA_CM
  Streamflow in cm for the period represented by the proportional sample

Q_AREA_MO
  Total monthly streamflow over watershed area

Q_AREA_YR
  Total annual streamflow for the wateryear

QA_SAMPLE
  Quality assurance sample number assigned if sample water is further analyzed for internal laboratory purposes

QCCODE
Quality control sample codes are assigned to samples collected for examining integrity of proportional sample analysis

**QCODE**
Streamflow value qualifier code

**QCODE_MO**
Monthly streamflow value qualifier code

**QCODE_YR**
Annual streamflow value qualifier code

**SAMPLER_TYPE**
Type of water sampler or method used to collect water

**SEQ_INDEX**
Sequential index generated primarily by the temporal order in which samples are collected

**SI**
Silica as silicon concentration; method: automated molybdenum blue

**SI_MO**
Mean monthly silica concentration

**SI_OUT_MO**
Total monthly silica outflow

**SI_OUTPUT**
Silica outflow

**SI_YR**
Mean annual silica concentration

**SICODE**
Silica value qualifier code

**SICODE_MO**
Monthly silica value qualifier code

**SICODE_YR**
Annual silica value qualifier code

**SITECODE**
Gaging station site code

**SO4S**
SO4-S (dissolved) concentration, sulfate as sulfur; method ion chromatography (automated barium sulfate before 1993)

**SO4S_MO**
Mean monthly sulfate-sulfur (SO4-S) concentration

**SO4S_OUT_MO**
Total monthly sulfate-sulfur (SO4-S) outflow

**SO4S_OUTPUT**
SO4-S (sulfate-sulfur) outflow
SO4S_YR
  Mean annual SO4-S (sulfate-sulfur) concentration

SO4SCODE
  SO4-S value qualifier code

SO4SCODE_MO
  Monthly sulfate-sulfur (SO4-S) value qualifier code

SO4SCODE_YR
  Annual SO4-S value qualifier code

SSED
  Suspended sediment concentration; method: nonfiltrable residue, gravimetric

SSED_MO
  Mean monthly suspended sediment concentration

SSED_OUT_MO
  Total monthly suspended sediment outflow

SSED_OUTPUT
  Suspended sediment outflow

SSED_YR
  Mean annual suspended sediment concentration

SSEDPCODE
  Suspended sediment value qualifier code

SSEDPCODE_MO
  Monthly suspended sediment value qualifier code

SSEDPCODE_YR
  Annual suspended sediment value qualifier code

STCODE
  Study code

TDN
  Total dissolved nitrogen concentration (filtered sample); method: persulfate digestion and analysis by automated colorimetric analysis; instrument: Technicon Auto-Analyzer II

TDN_MO
  Mean monthly total dissolved nitrogen concentration

TDN_OUT_MO
  Total monthly total dissolved nitrogen outflow (filtered sample)

TDN_OUTPUT
  Total dissolved nitrogen outflow (filtered sample)

TDN_YR
  Mean annual total dissolved nitrogen concentration

TDNCODE
Total dissolved nitrogen value qualifier code

TDNCODE_MO
  Monthly total dissolved nitrogen value qualifier code

TDNCODE_YR
  Annual total dissolved nitrogen value qualifier code

TDP
  Total dissolved phosphorus concentration; method: persulfate/H2SO4 digestion, ascorbic acid finish

TDP_MO
  Mean monthly total dissolved phosphorus concentration

TDP_OUT_MO
  Total monthly total dissolved phosphorus outflow

TDP_OUTPUT
  Total dissolved phosphorus outflow

TDP_YR
  Mean annual total dissolved phosphorus concentration

TDPCODE
  Total dissolved phosphorus value qualifier code

TDPCODE_MO
  Monthly total dissolved phosphorus value qualifier code

TDPCODE_YR
  Annual total dissolved phosphorus value qualifier code

TKN
  Total Kjeldahl nitrogen concentration on filtered sample (dissolved); method: Kjeldahl digestion H2SO4, CuSO4/KCl, nessler finish

TKN_MO
  Mean monthly total kjeldahl nitrogen concentration (dissolved)

TKN_OUT_MO
  Total monthly total Kjeldahl nitrogen (dissolved) outflow

TKN_OUTPUT
  Total Kjeldahl nitrogen (dissolved) outflow

TKN_YR
  Mean annual total kjeldahl nitrogen concentration (dissolved)

TKNCODE
  Total Kjeldahl nitrogen value qualifier code

TKNCODE_MO
  Monthly total Kjeldahl nitrogen (dissolved) value qualifier code

TKNCODE_YR
  Annual total Kjeldahl nitrogen value qualifier code
TYPE
  Sample type indicator

UTKN
  Total Kjeldahl nitrogen concentration on unfiltered sample; method: Kjeldahl digestion \(\text{H}_2\text{SO}_4\), \(\text{CuSO}_4/\text{KCl}\), nessler finish

UTKN_MO
  Mean monthly unfiltered total Kjeldahl nitrogen concentration

UTKN_OUT_MO
  Total monthly unfiltered total Kjeldahl nitrogen outflow

UTKN_OUTPUT
  Unfiltered total Kjeldahl nitrogen outflow

UTKN_YR
  Mean annual unfiltered total Kjeldahl nitrogen concentration

UTKNCODE
  Unfiltered total Kjeldahl nitrogen value qualifier code

UTKNCODE_MO
  Monthly unfiltered total Kjeldahl nitrogen value qualifier code

UTKNCODE_YR
  Annual unfiltered total Kjeldahl nitrogen value qualifier code

UTN
  Total nitrogen concentration (unfiltered sample); method: persulfate digestion and analysis by automated colorimetric analysis; instrument: Technicon Auto-Analyzer II

UTN_MO
  Mean monthly total nitrogen concentration (unfiltered samples)

UTN_OUT_MO
  Total monthly total nitrogen outflow (unfiltered sample)

UTN_OUTPUT
  Total nitrogen outflow (unfiltered sample)

UTN_YR
  Mean annual total nitrogen concentration (unfiltered samples)

UTNCODE
  Unfiltered total nitrogen value qualifier code

UTNCODE_MO
  Monthly unfiltered total nitrogen value qualifier code

UTNCODE_YR
  Annual unfiltered total nitrogen value qualifier code

UTP
  Unfiltered total phosphorus concentration; method: persulfate/\(\text{H}_2\text{SO}_4\) digestion, ascorbic acid finish

UTP_MO
Mean monthly unfiltered total phosphorus concentration

**UTP_OUT_MO**
Total monthly unfiltered total phosphorus outflow

**UTP_OUTPUT**
Unfiltered total phosphorus outflow

**UTP_YR**
Mean annual unfiltered total phosphorus concentration

**UTPCODE**
Unfiltered total phosphorus value qualifier code

**UTPCODE_MO**
Monthly unfiltered total phosphorus value qualifier code

**UTPCODE_YR**
Annual unfiltered total phosphorus value qualifier code

**WATERYEAR**
Water year of sample or annual summary (October-September)

**YEAR**
Calendar year of annual or monthly summary

Enumerated Domains:

Enumerated Domain for Attribute: **ALKCODE**

* Value is below detection limit for analysis (used beginning in 1991)
A Accepted value
E Estimated value
N No analytical measurement
Q Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: **ANCACODE**

D Derived anion-cation ratio value is based on the full set of anions and cations
N No anion-cation ratio calculation determined due to missing analytical components
D* Derived value - mathematically determined from other analytical measurements, one or more of which were below the detection limit
DE Derived value - mathematically determined from other analytical measurements, one or more of which were estimated values
DQ Derived value - mathematically determined from other analytical measurements, one or more of which were questionable values

Enumerated Domain for Attribute: **CACODE**

* Value is below detection limit for analysis (used beginning in 1991)
A Accepted value
E Estimated value
N No analytical measurement
Q Value is questionable (used beginning in 1991)
Enumerated Domain for Attribute: CLCODE
* Value is below detection limit for analysis (used beginning in 1991)
A Accepted value
E Estimated value
N No analytical measurement
Q Value is questionable (used beginning in 1991)
C Value confirmed, contamination or experimental tracer suspected (code use begins May 2007)

Enumerated Domain for Attribute: CONDCODE
* Value is below detection limit for analysis (used beginning in 1991)
A Accepted value
E Estimated value
N No analytical measurement
Q Value is questionable (used beginning in 1991)
C Confirmed value, contamination or experimental tracer suspected (code use begins May 2007)

Enumerated Domain for Attribute: DOCCODE
* Value is below detection limit for analysis (used beginning in 1991)
A Accepted value
E Estimated value
N No analytical measurement
Q Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: KCODE
* Value is below detection limit for analysis (used beginning in 1991)
A Accepted value
E Estimated value
N No analytical measurement
Q Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: MGCODE
* Value is below detection limit for analysis (used beginning in 1991)
A Accepted value
E Estimated value
N No analytical measurement
Q Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: NACODE
* Value is below detection limit for analysis (used beginning in 1991)
A Accepted value
E Estimated value
N No analytical measurement
Q Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: NH3NCODE
* Value is below detection limit for analysis (used beginning in 1991)
A Accepted value
E Estimated value
N No analytical measurement
Q Value is questionable (used beginning in 1991)
C Value confirmed, contamination suspected (code use begins May 2007)

Enumerated Domain for Attribute: NO3NCODE
* Value is below detection limit for analysis (used beginning in 1991)
A Accepted value
E Estimated value
N No analytical measurement
Q Value is questionable (used beginning in 1991)
C Value confirmed, contamination suspected (code use begins May 2011)

Enumerated Domain for Attribute: PO4PCODE
* Value is below detection limit for analysis (used beginning in 1991)
A Accepted value
E Estimated value
N No analytical measurement
Q Value is questionable (used beginning in 1991)
C Value confirmed, contamination suspected (code use begins May 2011)

Enumerated Domain for Attribute: DONCODE
N No derived value is calculated due to missing analytical components
D Derived value - mathematically determined from other analytical measurements
D* Derived value - mathematically determined from other analytical measurements, one or more of which were below the detection limit
DE Derived value - mathematically determined from other analytical measurements, one or more of which were estimated values
DQ Derived value - mathematically determined from other analytical measurements, one or more of which were questionable values
DC Derived value confirmed, contamination suspected (code use begins May 2007)

Enumerated Domain for Attribute: PHCODE
A Accepted value
E Estimated value
N  No analytical measurement
Q  Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: PARTNCODE
N  No derived value is calculated due to missing analytical components
D  Derived value - mathematically determined from other analytical measurements
D* Derived value - mathematically determined from other analytical measurements, one or more of which were below the detection limit
DE Derived value - mathematically determined from other analytical measurements, one or more of which were estimated values
DQ Derived value - mathematically determined from other analytical measurements, one or more of which were questionable values
DC Derived value confirmed, contamination suspected (code use begins May 2007)

Enumerated Domain for Attribute: PARTPCODE
N  No derived value is calculated due to missing analytical components
D  Derived value - mathematically determined from other analytical measurements
D* Derived value - mathematically determined from other analytical measurements, one or more of which were below the detection limit
DE Derived value - mathematically determined from other analytical measurements, one or more of which were estimated values
DQ Derived value - mathematically determined from other analytical measurements, one or more of which were questionable values

Enumerated Domain for Attribute: PVOLCODE
A  Accepted value for sample volume
E  Sample volume value is estimated
Q  Sample volume value is questionable - typically implies volume is measured correctly, but volume does not proportionally represent the collection period
N  No sample volume value available

Enumerated Domain for Attribute: QCODE
A  Accepted value for streamflow
N  No streamflow available for period
E  Estimated streamflow value
P  Provisional streamflow value is likely to change - used for USGS Lookout Creek streamflow
Q  Streamflow value for the period is questionable

Enumerated Domain for Attribute: SICODE
*  Value is below detection limit for analysis (used beginning in 1991)
A  Accepted value
E  Estimated value
N  No analytical measurement
Q  Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: SO4SCODE
*  Value is below detection limit for analysis (used beginning in 1991)
A  Accepted value
E Estimated value
N No analytical measurement
Q Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: SSEDCODE
A Accepted value
E Estimated value
N No analytical measurement
Q Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: STCODE
CF002 Study code CF002

Enumerated Domain for Attribute: TKNCODE
* Value is below detection limit for analysis (used beginning in 1991)
A Accepted value
E Estimated value
N No analytical measurement
Q Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: TDP CODE
* Value is below detection limit for analysis (used beginning in 1991)
A Accepted value
E Estimated value
N No analytical measurement
Q Value is questionable (used beginning in 1991)
C Value confirmed, contamination suspected (code use begins May 2011)

Enumerated Domain for Attribute: TYPE
QB Quality control samples taken below turbulence box
QS Quality control sample taken through sampler
QL Quality control sample taken through sampler and left in gage house until next collection
QA Quality control sample taken above flume
C Sample combined with preceding saved sample(s) for analysis - not used after 1981
G Grab sample taken in lieu of proportional sample
S Sample saved to combine with following collection (type 'C') due to insufficient water (not used after 1981). Nutrient concentrations of the following stream water sample are used to determine fluxes for this period.
N No sample is collected for this period
F Complete, full sample. Sampler operational throughout sampling period.
YE Year end marker allows summary by water year - this is not a sample. Flux
values are calculated from streamflow ending Sep 30 and use analyte concentrations from the following sample. "Y" markers are inserted every Sep30
A
Augmented sample - grab sample added to insufficient proportional sample (rarely used after 1987)
P
Partial sample - proportional sampler did not operate successfully over entire period
B
Biased sample - consecutive samples are proportionally separated and combined based on streamflow - code use begins WY 2008 to approx. two 3-week sampling intervals (where one sample is for 4 wks and the next for 2 wks)

Enumerated Domain for Attribute: UTKNCODE
* Value is below detection limit for analysis (used beginning in 1991)
  A Accepted value
  E Estimated value
  N No analytical measurement
  Q Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: UTPCODE
* Value is below detection limit for analysis (used beginning in 1991)
  A Accepted value
  E Estimated value
  N No analytical measurement
  Q Value is questionable (used beginning in 1991)
  C Value confirmed, contamination suspected (code use begins May 2011)

Enumerated Domain for Attribute: UTNCODE
* Value is below detection limit for analysis (used beginning in 1991)
  A Accepted value
  E Estimated value
  Q Value is questionable (used beginning in 1991)
  D Derived value - mathematically determined from other analytical measurements
  D* Derived value - mathematically determined from other analytical measurements, one or more of which were below the detection limit
  DE Derived value - mathematically determined from other analytical measurements, one or more of which were estimated values
  DQ Derived value - mathematically determined from other analytical measurements, one or more of which were questionable values
  N No analytical measurement or no derived value calculated due to missing analytical components
  C Value confirmed, contamination suspected (code use begins May 2011)

Enumerated Domain for Attribute: TDNCODE
* Value is below detection limit for analysis (used beginning in 1991)
  A Accepted value
  E Estimated value
  Q Value is questionable (used beginning in 1991)
D Derived value - mathematically determined from other analytical measurements

D* Derived value - mathematically determined from other analytical measurements, one or more of which were below the detection limit

DE Derived value - mathematically determined from other analytical measurements, one or more of which were estimated values

DQ Derived value - mathematically determined from other analytical measurements, one or more of which were questionable values

N No analytical measurement or no derived value calculated due to missing analytical components

C Value confirmed, contamination suspected (code use begins May 2007)

Enumerated Domain for Attribute: STCODE
CF002 Study code CF002

Enumerated Domain for Attribute: ALKCODE_MO
A Accepted monthly value
* Monthly value includes one or more values measured below the detection limit
E Monthly value includes estimated values
I Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
N No analyses conducted for proportional samples taken during the month
Q Monthly value includes questionable sample values

Enumerated Domain for Attribute: CACODE_MO
A Accepted monthly value
E Monthly value includes estimated values
I Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
N No analyses conducted for proportional samples taken during the month
Q Monthly value includes questionable sample values
IE Monthly value incomplete - only 6-25 days are proportionally sampled in the month; one or more values estimated

Enumerated Domain for Attribute: CLCODE_MO
A Accepted monthly value
I Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
N No analyses conducted for proportional samples taken during the month
E Monthly value includes estimated values

Enumerated Domain for Attribute: CONDCODE_MO
A Accepted monthly value
E Monthly value includes estimated values
I Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
N No analyses conducted for proportional samples taken during the month
Q Monthly value includes questionable sample values
IE Monthly value incomplete - only 6-25 days are proportionally sampled in the month; one or more values estimated

Enumerated Domain for Attribute: DOCCODE_MO
A Accepted monthly value
I Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
N No analyses conducted for proportional samples taken during the month
Q Monthly value includes questionable sample values
E Monthly value includes estimated values

Enumerated Domain for Attribute: DONCODE_MO
D Monthly value based on derived values
D* Monthly value based on derived values; one or more values measured below the detection limit
DE Monthly value based on derived values; one or more values estimated
DQ Monthly value based on derived values; one or more values questionable
DQ* Monthly value based on derived values; one or more values questionable; one or more values measured below the detection limit
ID Monthly value incomplete - only 6-25 days are proportionally sampled in the month; monthly value based on derived values
ID* Monthly value incomplete - only 6-25 days are proportionally sampled in the month; monthly value based on derived values of which one or more values measured below the detection limit
N No analyses conducted for proportional samples taken during the month
DE* Monthly value based on derived values; one or more values estimated

Enumerated Domain for Attribute: KCODE_MO
A Accepted monthly value
E Monthly value includes estimated values
I Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
N No analyses conducted for proportional samples taken during the month
Q Monthly value includes questionable sample values

Enumerated Domain for Attribute: MGCODE_MO
A Accepted monthly value
E Monthly value includes estimated values
I Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
N No analyses conducted for proportional samples taken during the month
Q Monthly value includes questionable sample values

Enumerated Domain for Attribute: NACODE_MO
A Accepted monthly value
E Monthly value includes estimated values
I Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
N No analyses conducted for proportional samples taken during the month
Q Monthly value includes questionable sample values

Enumerated Domain for Attribute: NH3NCODE_MO
A Accepted monthly value
* Monthly value includes one or more values measured below the detection limit
E Monthly value includes estimated values
I Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
N No analyses conducted for proportional samples taken during the month
Q* Monthly value includes questionable sample values
I* Monthly value incomplete - only 6-25 days are proportionally sampled in the month; one or more values measured below the detection limit
E* Monthly value includes estimated values; one or more values measured below the detection limit

Enumerated Domain for Attribute: NO3NCODE_MO
A Accepted monthly value
* Monthly value includes one or more values measured below the detection limit
E Monthly value includes estimated values
I Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
N No analyses conducted for proportional samples taken during the month
Q Monthly value includes questionable sample values
Q* Monthly value includes questionable sample values
I* Monthly value incomplete - only 6-25 days are proportionally sampled in the month; one or more values measured below the detection limit
E* Monthly value includes estimated values; one or more values measured below the detection limit

Enumerated Domain for Attribute: PARTNCODE_MO
D Monthly value based on derived values
D* Monthly value based on derived values; one or more values measured below the detection limit
DE Monthly value based on derived values; one or more values estimated
DQ Monthly value based on derived values; one or more values questionable
ID Monthly value incomplete - only 6-25 days are proportionally sampled in the month; monthly value based on derived values
N No analyses conducted for proportional samples taken during the month
DQ* Monthly value based on derived values; one or more values measured below the detection limit; one or more values questionable

Enumerated Domain for Attribute: PARTPCODE_MO
D Monthly value based on derived values
DE Monthly value based on derived values; one or more values estimated
DQ Monthly value based on derived values; one or more values questionable
ID Monthly value incomplete - only 6-25 days are proportionally sampled in the month; monthly value based on derived values
IDE Monthly value incomplete - only 6-25 days are proportionally sampled in the month; one or more values estimated
N No analyses conducted for proportional samples taken during the month

Enumerated Domain for Attribute: PHCODE_MO
A Accepted monthly value
E Monthly value includes estimated values
I Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
N No analyses conducted for proportional samples taken during the month
Q Monthly value includes questionable sample values
IE Monthly value incomplete - only 6-25 days are proportionally sampled in the month; one or more values estimated

Enumerated Domain for Attribute: PO4PCODE_MO
A Accepted monthly value
* Monthly value includes one or more values measured below the detection limit
E Monthly value includes estimated values
I Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
N No analyses conducted for proportional samples taken during the month
Q Monthly value includes questionable sample values

Enumerated Domain for Attribute: QCODE_MO
A Accepted monthly value
E Monthly value includes estimated values
I Monthly value incomplete - at least 5 days available, but 25 or fewer days
available for month summary

N  No analyses conducted for proportional samples taken during the month
Q  Monthly value includes questionable sample values
P  Monthly value includes provisional values subject to change

Enumerated Domain for Attribute: SICODE_MO
A  Accepted monthly value
I  Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
N  No analyses conducted for proportional samples taken during the month
Q  Monthly value includes questionable sample values
IQ Monthly value incomplete - only 6-25 days are proportionally sampled in the month; one or more values questionable
E  Monthly value includes estimated values
EQ Monthly value includes estimated values; one or more values were questionable

Enumerated Domain for Attribute: SO4SCODE_MO
A  Accepted monthly value
E  Monthly value includes estimated values
I  Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
N  No analyses conducted for proportional samples taken during the month

Enumerated Domain for Attribute: SSEDCODE_MO
A  Accepted monthly value
E  Monthly value includes estimated values
I  Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
N  No analyses conducted for proportional samples taken during the month
Q  Monthly value includes questionable sample values

Enumerated Domain for Attribute: TDNCODE_MO
*  Monthly value includes one or more values measured below the detection limit
D  Monthly value based on derived values
D* Monthly value based on derived values; one or more values measured below the detection limit
DE Monthly value based on derived values; one or more values estimated
DQ Monthly value based on derived values; one or more values questionable
DQ* Monthly value based on derived values; one or more values questionable; one or more values measured below the detection limit
I  Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
ID Monthly value incomplete - only 6-25 days are proportionally sampled in the month; monthly value based on derived values
ID* Monthly value incomplete - only 6-25 days are proportionally sampled in the month; monthly value based on derived values of which one or more values measured below the detection limit
IDE Monthly value incomplete - only 6-25 days are proportionally sampled in the
month; monthly value based on derived values of which one or more values are estimated
N  No analyses conducted for proportional samples taken during the month
Q  Monthly value includes questionable sample values
E  Monthly value includes estimated values
DE* Monthly value based on derived values; one or more values estimated
Q* Monthly value includes questionable sample values; one or more values measured below the detection limit
A  Accepted monthly value

Enumerated Domain for Attribute: TDPCODE_MO
A  Accepted monthly value
E  Monthly value includes estimated values
I  Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
N  No analyses conducted for proportional samples taken during the month
Q  Monthly value includes questionable sample values

Enumerated Domain for Attribute: TKNCODE_MO
A  Accepted monthly value
* Monthly value includes one or more values measured below the detection limit
E  Monthly value includes estimated values
I  Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
N  No analyses conducted for proportional samples taken during the month
Q  Monthly value includes questionable sample values

Enumerated Domain for Attribute: UTKNCODE_MO
A  Accepted monthly value
* Monthly value includes one or more values measured below the detection limit

ID Monthly value incomplete - only 6-25 days are proportionally sampled in the month; monthly value based on derived values
ID* Monthly value incomplete - only 6-25 days are proportionally sampled in the month; monthly value based on derived values of which one or more values measured below the detection limit
IDE Monthly value incomplete - only 6-25 days are proportionally sampled in the month; monthly value based on derived values of which one or more values are estimated
N No analyses conducted for proportional samples taken during the month
Q Monthly value includes questionable sample values
E Monthly value includes estimated values
DE* Monthly value based on derived values; one or more values estimated
Q* Monthly value includes questionable sample values; one or more values measured below the detection limit
A Accepted monthly value

Enumerated Domain for Attribute: UTPCODE_MO
A Accepted monthly value
E Monthly value includes estimated values
I Monthly value incomplete - at least 5 days available, but 25 or fewer days available for month summary
N No analyses conducted for proportional samples taken during the month
Q Monthly value includes questionable sample values
IE Monthly value incomplete - only 6-25 days are proportionally sampled in the month; one or more values estimated

Enumerated Domain for Attribute: ALKCODE_YR
N No analyses conducted in water year
Q Annual value includes questionable sample values
I Annual value incomplete; values are missing for part of the year and not included in annual summary
E Annual value includes estimated values
A Accepted annual value
* Annual value includes one or more values measured below the detection limit
I* Annual value incomplete; one or more values are missing for part of the year; one or more values measured below the detection limit
IE Annual value incomplete; one or more values are missing for part of the year; one or more values estimated
IQ Annual value incomplete; one or more values are missing for part of the year; one or more values questionable

Enumerated Domain for Attribute: CACODE_YR
N No analyses conducted in water year
Q Annual value includes questionable sample values
I Annual value incomplete; values are missing for part of the year and not included in annual summary
E Annual value includes estimated values
A Accepted annual value
Annual value includes one or more values measured below the detection limit

I\* Annual value incomplete; one or more values are missing for part of the year; one or more values measured below the detection limit

IE Annual value incomplete; one or more values are missing for part of the year; one or more values estimated

IQ Annual value incomplete; one or more values are missing for part of the year; one or more values questionable

Enumerated Domain for Attribute: CLCODE_YR
N No analyses conducted in water year
Q Annual value includes questionable sample values
I Annual value incomplete; values are missing for part of the year and not included in annual summary
E Annual value includes estimated values
A Accepted annual value

* Annual value includes one or more values measured below the detection limit

I\* Annual value incomplete; one or more values are missing for part of the year; one or more values measured below the detection limit

IE Annual value incomplete; one or more values are missing for part of the year; one or more values estimated

IQ Annual value incomplete; one or more values are missing for part of the year; one or more values questionable

Enumerated Domain for Attribute: CONDCODE_YR
N No analyses conducted in water year
Q Annual value includes questionable sample values
I Annual value incomplete; values are missing for part of the year and not included in annual summary
E Annual value includes estimated values
A Accepted annual value

* Annual value includes one or more values measured below the detection limit

I\* Annual value incomplete; one or more values are missing for part of the year; one or more values measured below the detection limit

IE Annual value incomplete; one or more values are missing for part of the year; one or more values estimated

IQ Annual value incomplete; one or more values are missing for part of the year; one or more values questionable

Enumerated Domain for Attribute: DOCCODE_YR
N No analyses conducted in water year
Q Annual value includes questionable sample values
I Annual value incomplete; values are missing for part of the year and not included in annual summary
E Annual value includes estimated values
A Accepted annual value

* Annual value includes one or more values measured below the detection limit

I\* Annual value incomplete; one or more values are missing for part of the year; one or more values measured below the detection limit

IE Annual value incomplete; one or more values are missing for part of the year; one or more values estimated

IQ Annual value incomplete; one or more values are missing for part of the year; one or more values questionable
Enumerated Domain for Attribute: KCODE_YR
N  No analyses conducted in water year
Q  Annual value includes questionable sample values
I  Annual value incomplete; values are missing for part of the year and not included in annual summary
E  Annual value includes estimated values
A  Accepted annual value
*  Annual value includes one or more values measured below the detection limit
I* Annual value incomplete; one or more values are missing for part of the year; one or more values measured below the detection limit
IE Annual value incomplete; one or more values are missing for part of the year; one or more values estimated
IQ Annual value incomplete; one or more values are missing for part of the year; one or more values questionable

Enumerated Domain for Attribute: MGCODE_YR
N  No analyses conducted in water year
Q  Annual value includes questionable sample values
I  Annual value incomplete; values are missing for part of the year and not included in annual summary
E  Annual value includes estimated values
A  Accepted annual value
*  Annual value includes one or more values measured below the detection limit
I* Annual value incomplete; one or more values are missing for part of the year; one or more values measured below the detection limit
IE Annual value incomplete; one or more values are missing for part of the year; one or more values estimated
IQ Annual value incomplete; one or more values are missing for part of the year; one or more values questionable

Enumerated Domain for Attribute: NACODE_YR
N  No analyses conducted in water year
Q  Annual value includes questionable sample values
I  Annual value incomplete; values are missing for part of the year and not included in annual summary
E  Annual value includes estimated values
A  Accepted annual value
*  Annual value includes one or more values measured below the detection limit
I* Annual value incomplete; one or more values are missing for part of the year; one or more values measured below the detection limit
IE Annual value incomplete; one or more values are missing for part of the year; one or more values estimated
IQ Annual value incomplete; one or more values are missing for part of the year; one or more values questionable

Enumerated Domain for Attribute: NH3NCODE_YR
N  No analyses conducted in water year
Q  Annual value includes questionable sample values
I  Annual value incomplete; values are missing for part of the year and not included in annual summary
E  Annual value includes estimated values
A  Accepted annual value
*  Annual value includes one or more values measured below the detection limit
I* Annual value incomplete; one or more values are missing for part of the year; one or more values measured below the detection limit
IE Annual value incomplete; one or more values are missing for part of the year; one or more values estimated
IQ Annual value incomplete; one or more values are missing for part of the year; one or more values questionable

Enumerated Domain for Attribute: NO3NCODE_YR
N  No analyses conducted in water year
Q  Annual value includes questionable sample values
I  Annual value incomplete; values are missing for part of the year and not included in annual summary
E  Annual value includes estimated values
A  Accepted annual value
*  Annual value includes one or more values measured below the detection limit
I* Annual value incomplete; one or more values are missing for part of the year; one or more values measured below the detection limit
IE Annual value incomplete; one or more values are missing for part of the year; one or more values estimated
IQ Annual value incomplete; one or more values are missing for part of the year; one or more values questionable

Enumerated Domain for Attribute: PO4PCODE_YR
N  No analyses conducted in water year
Q  Annual value includes questionable sample values
I  Annual value incomplete; values are missing for part of the year and not included in annual summary
E  Annual value includes estimated values
A  Accepted annual value
*  Annual value includes one or more values measured below the detection limit
I* Annual value incomplete; one or more values are missing for part of the year; one or more values measured below the detection limit
IE Annual value incomplete; one or more values are missing for part of the year; one or more values estimated
IQ Annual value incomplete; one or more values are missing for part of the year; one or more values questionable

Enumerated Domain for Attribute: DONCODE_YR
N  No derived values are calculated for the entire water year
D  Annual value based on derived values
D* Annual value based on derived values; one or more values measured below the detection limit
DE Annual value based on derived values; one or more values estimated
DQ Annual value based on derived values; one or more values questionable
ID Annual value incomplete; one or more values are missing for part of the year; annual value based on derived values
ID* Annual value incomplete; one or more values are missing for part of the year; annual value based on derived values of which one or more values measured
below the detection limit

IDE
Annual value incomplete; one or more values are missing for part of the year; annual value based on derived values of which one or more values are estimated

IDQ
Annual value incomplete; one or more values are missing for part of the year; annual value based on derived values of which one or more values are questionable

Enumerated Domain for Attribute: PHCODE_YR
N No analyses conducted in water year
Q Annual value includes questionable sample values
I Annual value incomplete; values are missing for part of the year and not included in annual summary
E Annual value includes estimated values
A Accepted annual value
IE Annual value incomplete; one or more values are missing for part of the year; one or more values estimated
IQ Annual value incomplete; one or more values are missing for part of the year; one or more values questionable

Enumerated Domain for Attribute: PARTNCODE_YR
N No derived values are calculated for the entire water year
D Annual value based on derived values
D* Annual value based on derived values; one or more values measured below the detection limit
DE Annual value based on derived values; one or more values estimated
DQ Annual value based on derived values; one or more values questionable
ID Annual value incomplete; one or more values are missing for part of the year; annual value based on derived values
ID* Annual value incomplete; one or more values are missing for part of the year; annual value based on derived values of which one or more values measured below the detection limit

Enumerated Domain for Attribute: TYPE
QB Quality control samples taken below turbulence box
QS Quality control sample taken through sampler
QL Quality control sample taken through sampler and left in gage house until next collection
QA Quality control sample taken above flume
C Sample combined with preceeding saved sample(s) for analysis - not used after
1981

G Grab sample taken in lieu of proportional sample

S Sample saved to combine with following collection (type 'C') due to insufficient water (not used after 1981). Nutrient concentrations of the following stream water sample are used to determine fluxes for this period.

N No sample is collected for this period

F Complete, full sample. Sampler operational throughout sampling period.

YE Year end marker allows summary by water year - this is not a sample. Flux values are calculated from streamflow ending Sep 30 and use analyte concentrations from the following sample. 'Y' markers are inserted every Sep30

A Augmented sample - grab sample added to insufficient proportional sample (rarely used after 1987)

P Partial sample - proportional sampler did not operate successfully over entire period

B Biased sample - consecutive samples are proportionally separated and combined based on streamflow - code use begins WY 2008 to approx. two 3-week sampling intervals (where one sample is for 4 wks and the next for 2 wks)

Enumerated Domain for Attribute: UTKNCODE

* Value is below detection limit for analysis (used beginning in 1991)

A Accepted value

E Estimated value

N No analytical measurement

Q Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: UTPCODE

* Value is below detection limit for analysis (used beginning in 1991)

A Accepted value

E Estimated value

N No analytical measurement

Q Value is questionable (used beginning in 1991)

C Value confirmed, contamination suspected (code use begins May 2011)

Enumerated Domain for Attribute: UTNCODE

* Value is below detection limit for analysis (used beginning in 1991)

A Accepted value

E Estimated value

Q Value is questionable (used beginning in 1991)

D Derived value - mathematically determined from other analytical measurements

D* Derived value - mathematically determined from other analytical measurements, one or more of which were below the detection limit

DE Derived value - mathematically determined from other analytical measurements, one or more of which were estimated values

DQ Derived value - mathematically determined from other analytical measurements, one or more of which were questionable values

N No analytical measurement or no derived value calculated due to missing analytical components
C Value confirmed, contamination suspected (code use begins May 2011)

Enumerated Domain for Attribute: TDNCODE

* Value is below detection limit for analysis (used beginning in 1991)
A Accepted value
E Estimated value
Q Value is questionable (used beginning in 1991)
D Derived value - mathematically determined from other analytical measurements
D* Derived value - mathematically determined from other analytical measurements, one or more of which were below the detection limit
DE Derived value - mathematically determined from other analytical measurements, one or more of which were estimated values
DQ Derived value - mathematically determined from other analytical measurements, one or more of which were questionable values
N No analytical measurement or no derived value calculated due to missing analytical components
C Value confirmed, contamination suspected (code use begins May 2007)

Enumerated Domain for Attribute: STCODE

CF002 Study code CF002

Enumerated Domain for Attribute: TYPE

QB Quality control samples taken below turbulence box
QS Quality control sample taken through sampler
QL Quality control sample taken through sampler and left in gage house until next collection
QA Quality control sample taken above flume
C Sample combined with preceding saved sample(s) for analysis - not used after 1981
G Grab sample taken in lieu of proportional sample
S Sample saved to combine with following collection (type 'C') due to insufficient water (not used after 1981). Nutrient concentrations of the following stream water sample are used to determine fluxes for this period.
N No sample is collected for this period
F Complete, full sample. Sampler operational throughout sampling period.
YE Year end marker allows summary by water year - this is not a sample. Flux values are calculated from streamflow ending Sep 30 and use analyte concentrations from the following sample. ‘Y’ markers are inserted every Sep30
A Augmented sample - grab sample added to insufficient proportional sample (rarely used after 1987)
P Partial sample - proportional sampler did not operate successfully over entire period
B Biased sample - consecutive samples are proportionally separated and combined based on streamflow - code use begins WY 2008 to approx. two 3-week sampling intervals (where one sample is for 4 wks and the next for 2 wks)

Enumerated Domain for Attribute: QCOCODE

NA Water sample is not a quality control sample
QA Quality control water sample taken above the flume
QB Quality control water sample taken below the turbulence box
QL Quality control water sample taken through the sampler and left in the gage house until the next collection
QS Quality control water sample taken through the sampler
QZ Additional or miscellaneous quality control water sample
