Title: Precipitation chemistry concentrations and fluxes, HJ Andrews Experimental Forest, 1969 to present

Abstract:

Collection and analyses of precipitation chemistry were initiated in 1969 at the low-elevation Primary Met site, and in 1973 at a mid-elevation Hi-15 site. Rain collection samples accumulate from one week to three weeks in bulk and NADP type collectors and then are transported to Cooperative Chemical Analytical Laboratory (CCAL) for analysis. Analytes include nitrogen, phosphorus, carbon, and cations and anions as well as pH, conductivity, alkalinity and particulate sediment. Concentration and volume of precipitation are combined for inflow. Dry deposition chemistry concentrations began in 1989 and are analyzed 2-4 times per year at one site. The original objectives were to evaluate precipitation chemistry inputs versus chemistry outputs in streamflow from forested watersheds. The study has evolved into a general monitoring effort for precipitation chemistry that is among the least contaminated of any within the USA. This study is conducted in conjunction with Andrews streamflow chemistry (CF002) and the U.S. National Atmospheric Deposition Program (NADP).

Keywords: Chemical analysis; Hydrology/Water; Nutrients; Precipitation; Solution transport; Timber harvesting; Water chemistry; Inorganic nutrients; Hydrology; Water chemistry; precipitation; chemical properties; concentration; suspended solids; timber harvest; inorganic nutrients; nutrients; water;

Date data commenced: 1968-10-01

Date data terminated: 2019-05-22

Principal Investigator: Sherri L. Johnson

List of Entities:

1. Precipitation water sample nutrient concentrations
2. Precipitation water nutrient inflow in kg/ha
3. Precipitation water nutrient mean annual concentrations
6. Precipitation water sample log sheet: field and laboratory comments

1. Precipitation water sample nutrient concentrations

Precipitation samples are collected and analyzed on a 3-week basis for nutrient concentrations. Precipitation amounts for each sampling period are provided.

Attributes Definitions:

ALK
Alkalinity as calcium carbonate (CaCO3); method: electrometric titration to pH 4.5; all data is converted from the formerly used units of bicarbonate carbon (HCO3-C)

ALK_INPUT
Alkalinity inflow as CaCO3 (units have been converted for all values from bicarbonate (HCO3-C) to calcium carbonate)

ALK_YR
Mean annual alkalinity concentration as CaCO3 (calcium carbonate) - all values have been converted from HCO3-C (bi-carbonate)

ALKCODE
Alkalinity value qualifier code

ALKCODE_YR
Annual alkalinity qualifier value code

ANCA
Anion-cation ratio: micro equivalence ratio of anions to cations by calculation - provided only as an analytical check. Requires anions: ALK, SO4S, CL, NO3N, PO4P, cations: pH, Na, K, Ca, Mg, NH4N

ANCACODE
Anion-cation ratio qualifier code

CA
Dissolved calcium (filtrable) concentration; method flame atomic absorption spectroscopy

CA_INPUT
Calcium inflow

CA_YR
Mean annual calcium concentration

CACODE
Ca value qualifier code

CACODE_YR
Annual Ca value qualifier code

CL
Chloride (dissolved) concentration; method: ion chromatography (automated ferric thiocyanate before 1993)

CL_INPUT
Chloride inflow
CL_YR
   Mean annual chloride concentration

CLCODE
   Cl value qualifier code

CLCODE_YR
   Annual Cl value qualifier code

COND
   Specific conductance; method: wheatstone bridge

COND_YR
   Mean annual specific conductivity concentration

CONDCODE
   Conductivity value qualifier code

CONDCODE_YR
   Annual conductivity value qualifier code

DATE_TIME
   Collection date and time (PST) of the precipitation sample - sample represents deposition from the previous sample date and time. Assume beginning date of first sample period for each collector is October 1st.

DOC
   DOC, dissolved organic carbon concentration; method: combustion

DOC_INPUT
   Dissolved organic carbon inflow

DOC_YR
   Mean annual dissolved organic carbon concentration

DOCCODE
   DOC value qualifier code

DOCCODE_YR
   Annual DOC value qualifier code

DON
   Dissolved organic nitrogen - not measured analytically; mathematically determined by subtracting NH3-N and NO3-N from Total dissolved nitrogen. Values before May 2005 are determined by TKN minus NH3-N.

DON_INPUT
   Dissolved organic N inflow - not measured analytically; mathematically determined by subtracting NH3-N and NO3-N from Total dissolved nitrogen. Values before May 2005 are determined by TKN minus NH3-N

DON_YR
   Mean annual dissolved organic N concentration - not measured analytically; mathematically determined by subtracting NH3-N and NO3-N from Total dissolved nitrogen. Values before May 2005 are determined by TKN minus NH3-N

DONCODE
   Dissolved organic nitrogen value qualifier code

DONCODE_YR
Annual dissolved organic N value qualifier code

ENTITY

   Entity number

FIELD_COMMENTS

   Field comments related to the collection of the water sample

K

   K, dissolved potassium (filtrable) concentration; method flame atomic absorption spectroscopy

K_INPUT

   Potassium inflow

K_YR

   Mean annual potassium concentration

KCODE

   K value qualifier code

KCODE_YR

   Annual K value qualifier code

LAB_COMMENTS

   Laboratory comments related to the handling and analyses of the sample

LABNO

   Lab number code for sample

LOW_VOLUME

   Indicator of a low volume sampler that may restrict the breadth of laboratory analyses

MG

   Mg, dissolved magnesium (filtrable) concentration; method flame atomic absorption spectroscopy

MG_INPUT

   Magnesium inflow

MG_YR

   Mean annual magnesium concentration

MGCODE

   Mg value qualifier code

MGCODE_YR

   Annual Mg value qualifier code

NA

   Na, dissolved sodium (filtrable) concentration; method flame atomic absorption spectroscopy

NA_INPUT

   Sodium inflow

NA_YR

   Mean annual sodium concentration
NACODE
   Na value qualifier code
NACODE_YR
   Annual Na value qualifier code
NH3N
   Ammonia-nitrogen (NH3-N) concentration, ammonia as nitrogen; method: automated phenate
NH3N_INPUT
   Ammonia-nitrogen (NH3-N) inflow
NH3N_YR
   Mean annual ammonia (NH3-N) concentration
NH3NCODE
   NH3-N value qualifier code
NH3NCODE_YR
   Annual NH3-N value qualifier code
NO3N
   Nitrate-nitrogen (NO3-N), nitrate + nitrite as nitrogen concentration; method: automated cadmium reduction
NO3N_INPUT
   Nitrate-nitrogen (NO3-N) inflow
NO3N_YR
   Mean annual nitrate-nitrogen (NO3-N) concentration
NO3NCODE
   NO3-N value qualifier code
NO3NCODE_YR
   Annual NO3-N value qualifier code
PARTN
   Particulate N, also known as total suspended nitrogen - not measured analytically; mathematically determined by subtraction of Total dissolved nitrogen (TDN) from Unfiltered Total nitrogen (UTN). Values before May 2005 are determined by UTKN minus TKN.
PARTN_INPUT
   Particulate N inflow - not measured analytically; mathematically determined by subtraction of Total dissolved nitrogen (TDN) from Unfiltered Total nitrogen (UTN). Values before May 2005 are determined by UTKN minus TKN.
PARTN_YR
   Mean annual particulate N concentration - not measured analytically; mathematically determined by subtraction of Total dissolved nitrogen (TDN) from Unfiltered Total nitrogen (UTN). Values before May 2005 are determined by UTKN minus TKN.
PARTNCODE
   Particulate N value qualifier code
PARTNCODE_YR
   Annual particulate N value qualifier code
PARTP
   Particulate P, also known as total suspended phosphorus - not measured analytically; mathematically determined by subtraction of Total
Dissolved P (TDP) from Unfiltered Total P (UTP)

**PARTP_INPUT**
Particulate P inflow - not measured analytically; mathematically determined by subtraction of Total Dissolved P (TDP) from Unfiltered Total P (UTP)

**PARTP_YR**
Mean annual particulate P - not measured analytically; mathematically determined by subtraction of Total Dissolved P (TDP) from Unfiltered Total P (UTP)

**PARTPCODE**
Particulate P value qualifier code

**PARTPCODE_YR**
Annual particulate P value qualifier code

**PCODE**
Precipitation value qualifier code

**PCODE_YR**
Annual precipitation value qualifier code

**PH**
pH (hydrogen concentration); method: glass electrode

**PH_YR**
Mean annual pH

**PHCODE**
pH value qualifier code

**PHCODE_YR**
Annual pH value qualifier code

**PO4P**
Ortho phosphorus concentration, soluble reactive phosphorus, phosphate (PO4-P); method: ascorbic acid finish

**PO4P_INPUT**
Ortho phosphorus (PO4-P) inflow

**PO4P_YR**
Mean annual ortho phosphorus (PO4-P) concentration

**PO4PCODE**
Ortho phosphorus value qualifier code

**PO4PCODE_YR**
Annual ortho phosphorus value qualifier code

**PRECIP_CM**
Precipitation in centimeters for the exact sample period. Based on precipitation stations CS2MET or PRIMET (beginning WY 2003) for collector RCADMN and H15MET or CENMET (beginning WY 2006) for collectors RCHIF7, RCHIR7 and RCHI15.

**PRECIP_CM**
Precipitation in centimeters for the exact sample period. Based on CS2MET (RCADMN) or H15MET (RCHIR7, RCHI15) meteorological station precipitation.
<table>
<thead>
<tr>
<th>Variable</th>
<th>Description</th>

<tr>
<td>SSED</td>
<td></td>
</tr>
</tbody>
</table>
Suspended sediment concentration; method: nonfiltrable residue, gravimetric

**SSED_INPUT**
Suspended sediment inflow

**SSED_YR**
Mean annual suspended sediment concentration

**SSEDCODE**
Suspended sediment value qualifier code

**SSEDCODE_YR**
Annual suspended sediment value qualifier code

**STCODE**
Study code

**TDN**
Total dissolved nitrogen concentration (filtered sample); method: persulfate digestion and analysis by automated colorimetric analysis; instrument: Technicon Auto-Analyzer II

**TDN_INPUT**
Total dissolved nitrogen inflow (filtered sample)

**TDN_YR**
Mean annual total dissolved nitrogen concentration

**TDNCODE**
Total dissolved nitrogen value qualifier code

**TDNCODE_YR**
Annual total dissolved nitrogen value qualifier code

**TDP**
Total dissolved phosphorus concentration; method: persulfate/H2SO4 digestion, ascorbic acid finish

**TDP_INPUT**
Total dissolved phosphorus inflow

**TDP_YR**
Mean annual total dissolved phosphorus concentration

**TDPCODE**
Total dissolved phosphorus value qualifier code

**TDPCODE_YR**
Annual total dissolved phosphorus value qualifier code

**TKN**
Total Kjeldahl nitrogen concentration on filtered sample (dissolved); method: Kjeldahl digestion H2SO4, CuSO4/KCl, nessler finish

**TKN_INPUT**
Total Kjeldahl nitrogen (dissolved) inflow

**TKN_YR**
Mean annual total Kjeldahl nitrogen concentration (dissolved)
TKNCODE
Total Kjeldahl nitrogen value qualifier code

TKNCODE_YR
Annual total Kjeldahl nitrogen value qualifier code

TYPE
Sample type indicator - indicates dry deposition samples and other qualifying information

UTKN
Total Kjeldahl nitrogen concentration on unfiltered sample; method: Kjeldahl digestion H2SO4, CuSO4/KCl, nessler finish

UTKN_INPUT
Unfiltered total Kjeldahl nitrogen inflow

UTKN_YR
Mean annual unfiltered total Kjeldahl nitrogen concentration

UTKNCODE
Unfiltered total Kjeldahl nitrogen value qualifier code

UTKNCODE_YR
Annual unfiltered total Kjeldahl nitrogen value qualifier code

UTN
Total nitrogen concentration (unfiltered sample); method: persulfate digestion and analysis by automated colorimetric analysis; instrument: Technicon Auto-Analyzer II

UTN_INPUT
Total nitrogen inflow (unfiltered sample)

UTN_YR
Mean annual total nitrogen concentration (unfiltered samples)

UTNCODE
Unfiltered total nitrogen value qualifier code

UTNCODE_YR
Annual unfiltered total nitrogen value qualifier code

UTP
Unfiltered total phosphorus concentration; method: persulfate/H2SO4 digestion, ascorbic acid finish

UTP_INPUT
Unfiltered total phosphorus inflow

UTP_YR
Mean annual unfiltered total phosphorus concentration

UTPCODE
Unfiltered total phosphorus value qualifier code

UTPCODE_YR
Annual unfiltered total phosphorus value qualifier code

WATERYEAR
Water year of sample or annual summary (October-September)

Enumerated Domains:

Enumerated Domain for Attribute: ALKCODE
A  Accepted value
E  Estimated value
N  No analytical measurement
*  Value is below detection limit for analysis (used beginning in 1991)
Q  Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: ANCACODE
N  No anion-cation ratio calculation determined due to missing analytical components
D  Derived anion-cation ratio value is based on the full set of anions and cations
D* Derived value - mathematically determined from other analytical measurements, one or more of which were below the detection limit
DE Derived value - mathematically determined from other analytical measurements, one or more of which were estimated values
DQ Derived value - mathematically determined from other analytical measurements, one or more of which were questionable values

Enumerated Domain for Attribute: CACODE
A  Accepted value
E  Estimated value
N  No analytical measurement
*  Value is below detection limit for analysis (used beginning in 1991)
Q  Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: CLCODE
A  Accepted value
E  Estimated value
N  No analytical measurement
*  Value is below detection limit for analysis (used beginning in 1991)
Q  Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: CONDCODE
A  Accepted value
E  Estimated value
N  No analytical measurement
*  Value is below detection limit for analysis (used beginning in 1991)
Q  Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: DOCCODE
A  Accepted value
E  Estimated value
N  No analytical measurement
*  Value is below detection limit for analysis (used beginning in 1991)
Q  Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: KCODE
A  Accepted value
E  Estimated value
N  No analytical measurement
*  Value is below detection limit for analysis (used beginning in 1991)
Q  Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: MGCODE
A  Accepted value
E  Estimated value
N  No analytical measurement
*  Value is below detection limit for analysis (used beginning in 1991)
Q  Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: NACODE
A  Accepted value
E  Estimated value
N  No analytical measurement
*  Value is below detection limit for analysis (used beginning in 1991)
Q  Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: NH3NCODE
A  Accepted value
E  Estimated value
N  No analytical measurement
*  Value is below detection limit for analysis (used beginning in 1991)
Q  Value is questionable (used beginning in 1991)
C  Value confirmed, contamination suspected (code use begins May 2007)

Enumerated Domain for Attribute: NO3NCODE
A  Accepted value
E  Estimated value
N  No analytical measurement
*  Value is below detection limit for analysis (used beginning in 1991)
Q  Value is questionable (used beginning in 1991)
C Value confirmed, contamination suspected (code use begins May 2007)

Enumerated Domain for Attribute: PO4PCODE
A Accepted value
E Estimated value
N No analytical measurement
* Value is below detection limit for analysis (used beginning in 1991)
Q Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: PCODE
N No precipitation recorded for period. For saved sample (type='S'), precipitation for this period is included in the following period.
E Estimated precipitation
A Accepted value for precipitation
Q Precipitation value is questionable
M Missing value

Enumerated Domain for Attribute: PHCODE
A Accepted value
E Estimated value
N No analytical measurement
Q Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: PVOLCODE
Q Sample volume value is questionable - typically implies volume is measured correctly, but volume does not represent the entire collection period
N No sample volume value available
A Accepted value
K Volume is precipitation plus added DIW (usually 250 ml). Concentration values are based on this volume.
L Volume of lab water (DIW) added to dry bucket (usually 250 ml). Concentration values are based on this volume.
M Volume is precipitation in dry bucket (liters). Concentration values are based on this volume. No DIW added to the precipitation water.

Enumerated Domain for Attribute: SICODE
A Accepted value
E Estimated value
N No analytical measurement
* Value is below detection limit for analysis (used beginning in 1991)
Q Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: SO4SCODE
A Accepted value
E Estimated value
N No analytical measurement
Value is below detection limit for analysis (used beginning in 1991)

Q Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: SSEDCODE
A Accepted value
E Estimated value
N No analytical measurement
Q Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: STCODE
CP002 Study code CP002

Enumerated Domain for Attribute: TKNCODE
A Accepted value
E Estimated value
N No analytical measurement
* Value is below detection limit for analysis (used beginning in 1991)
Q Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: TDPCODE
A Accepted value
E Estimated value
N No analytical measurement
* Value is below detection limit for analysis (used beginning in 1991)
Q Value is questionable (used beginning in 1991)

Enumerated Domain for Attribute: TYPE
S Sample saved and combined with the following collection due to insufficient water for analyses - samples were no longer saved and combined after 1981
P Partial sample - precipitation was not collected successfully over the entire period (includes problems with NADP-style collector motor or samples that may have overflowed)
YE Year end marker allows summary by water year - this is not a sample. Flux values are calculated from precip ending Sep 30 and use analyte concentrations from the following sample. ‘YE’ markers are inserted every Sep 30.
C Sample is combined with preceeding saved sample(s) for analysis. Combined samples of this type are not used after 1981.
DW Dry deposition sample - dry bucket contains rain water
F Sample is successfully collected over the entire period - a "Full" sample.
N No sample is collected - generally indicates periods of little or no rain, but can be a lost sample.
DF Dry deposition sample - sample is dry and not contaminated with precipitation water
B Biased sample - Lid on NADP sampler malfunctions and sample includes dry deposition
DC Dry deposition sample - dry bucket contains rain water and other insects/contaminants

- *: Annual value includes one or more values measured below the detection limit

Enumerated Domain for Attribute: MGCODE_YR
- Q: Annual value includes questionable values
- N: No analyses conducted in water year
- A: Annual value is accepted
E Annual value includes estimated values
I Annual value incomplete; one or more values are missing for part of the year
I* Annual value incomplete; one or more values are missing for part of the year; one or more values measured below the detection limit
IE Annual value incomplete; one or more values are missing for part of the year; one or more values estimated
IQ Annual value incomplete; one or more values are missing for part of the year; one or more values questionable
* Annual value includes one or more values measured below the detection limit

Enumerated Domain for Attribute: NACODE_YR
Q Annual value includes questionable values
N No analyses conducted in water year
A Annual value is accepted
E Annual value includes estimated values
I Annual value incomplete; one or more values are missing for part of the year
I* Annual value incomplete; one or more values are missing for part of the year; one or more values measured below the detection limit
IE Annual value incomplete; one or more values are missing for part of the year; one or more values estimated
IQ Annual value incomplete; one or more values are missing for part of the year; one or more values questionable
* Annual value includes one or more values measured below the detection limit

Enumerated Domain for Attribute: NH3NCODE_YR
Q Annual value includes questionable values
N No analyses conducted in water year
A Annual value is accepted
E Annual value includes estimated values
I Annual value incomplete; one or more values are missing for part of the year
I* Annual value incomplete; one or more values are missing for part of the year; one or more values measured below the detection limit
IE Annual value incomplete; one or more values are missing for part of the year; one or more values estimated
IQ Annual value incomplete; one or more values are missing for part of the year; one or more values questionable
* Annual value includes one or more values measured below the detection limit

Enumerated Domain for Attribute: NO3NCODE_YR
Q Annual value includes questionable values
N No analyses conducted in water year
A Annual value is accepted
E Annual value includes estimated values
I Annual value incomplete; one or more values are missing for part of the year
I* Annual value incomplete; one or more values are missing for part of the year; one or more values measured below the detection limit
IE Annual value incomplete; one or more values are missing for part of the year; one or more values estimated
IQ Annual value incomplete; one or more values are missing for part of the year; one or more values questionable
* Annual value includes one or more values measured below the detection limit
IQ: Annual value incomplete; one or more values are missing for part of the year; one or more values questionable
*
Annual value includes one or more values measured below the detection limit

Enumerated Domain for Attribute: PO4PCODE_YR
Q: Annual value includes questionable values
N: No analyses conducted in water year
A: Annual value is accepted
E: Annual value includes estimated values
I: Annual value incomplete; one or more values are missing for part of the year
I*: Annual value incomplete; one or more values are missing for part of the year; one or more values measured below the detection limit
IE: Annual value incomplete; one or more values are missing for part of the year; one or more values estimated
IQ: Annual value incomplete; one or more values are missing for part of the year; one or more values questionable
*: Annual value includes one or more values measured below the detection limit

Enumerated Domain for Attribute: DONCODE_YR
N: No derived values are calculated for the entire water year
D: Annual value based on derived values
D*: Annual value based on derived values; one or more values measured below the detection limit
DE: Annual value based on derived values; one or more values estimated
DQ: Annual value based on derived values; one or more values questionable
ID: Annual value incomplete; one or more values are missing for part of the year; annual value based on derived values
ID*: Annual value incomplete; one or more values are missing for part of the year; annual value based on derived values of which one or more values measured below the detection limit
IDE: Annual value incomplete; one or more values are missing for part of the year; annual value based on derived values of which one or more values are estimated
IDQ: Annual value incomplete; one or more values are missing for part of the year; annual value based on derived values of which one or more values are questionable

Enumerated Domain for Attribute: PCODE_YR
I: Incomplete, parts of year missing from annual summary
A: All precipitation is included and not estimated for the wateryear
E: Total includes estimated precipitation values
Q: Precipitation total may be questionable for some periods of the wateryear

Enumerated Domain for Attribute: PHCODE_YR
Q: Annual value includes questionable values
N: No analyses conducted in water year
A: Annual value is accepted
E: Annual value includes estimated values
I: Annual value incomplete; one or more values are missing for part of the year
IE Annual value incomplete; one or more values are missing for part of the year; one or more values estimated
IQ Annual value incomplete; one or more values are missing for part of the year; one or more values questionable

Enumerated Domain for Attribute: PARTPCODE_YR
N No derived values are calculated for the entire water year
D Annual value based on derived values
D* Annual value based on derived values; one or more values measured below the detection limit
DE Annual value based on derived values; one or more values estimated
DQ Annual value based on derived values; one or more values questionable
ID Annual value incomplete; one or more values are missing for part of the year; annual value based on derived values
ID* Annual value incomplete; one or more values are missing for part of the year; annual value based on derived values of which one or more values measured below the detection limit
IDE Annual value incomplete; one or more values are missing for part of the year; annual value based on derived values of which one or more values are estimated
IDQ Annual value incomplete; one or more values are missing for part of the year; annual value based on derived values of which one or more values are questionable

Enumerated Domain for Attribute: SICODE_YR
Q Annual value includes questionable values
N No analyses conducted in water year
A Annual value is accepted
E Annual value includes estimated values
I Annual value incomplete; one or more values are missing for part of the year
I* Annual value incomplete; one or more values are missing for part of the year; one or more values measured below the detection limit
IE Annual value incomplete; one or more values are missing for part of the year; one or more values estimated
IQ Annual value incomplete; one or more values are missing for part of the year; one or more values questionable
A  Annual value is accepted
E  Annual value includes estimated values
I  Annual value incomplete; one or more values are missing for part of the year
I* Annual value incomplete; one or more values are missing for part of the year; one or more values measured below the detection limit
IE Annual value incomplete; one or more values are missing for part of the year; one or more values estimated
IQ Annual value incomplete; one or more values are missing for part of the year; one or more values questionable
* Annual value includes one or more values measured below the detection limit

Enumerated Domain for Attribute: UTKNCODE_YR
Q  Annual value includes questionable values

Enumerated Domain for Attribute: STCODE
CP002 Study code CP002
### Enumerated Domain for Attribute: TYPE

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>S</td>
<td>Sample saved and combined with the following collection due to insufficient water for analyses - samples were no longer saved and combined after 1981.</td>
</tr>
<tr>
<td>P</td>
<td>Partial sample - precipitation was not collected successfully over the entire period (includes problems with NADP-style collector motor or samples that may have overflowed).</td>
</tr>
<tr>
<td>YE</td>
<td>Year end marker allows summary by water year - this is not a sample. Flux values are calculated from precip ending Sep 30 and use analyte concentrations from the following sample. ‘YE’ markers are inserted every Sep 30.</td>
</tr>
<tr>
<td>C</td>
<td>Sample is combined with preceding saved sample(s) for analysis. Combined samples of this type are not used after 1981.</td>
</tr>
<tr>
<td>DW</td>
<td>Dry deposition sample - dry bucket contains rain water.</td>
</tr>
<tr>
<td>F</td>
<td>Sample is successfully collected over the entire period - a &quot;Full&quot; sample.</td>
</tr>
<tr>
<td>N</td>
<td>No sample is collected - generally indicates periods of little or no rain, but can be a lost sample.</td>
</tr>
<tr>
<td>DF</td>
<td>Dry deposition sample - sample is dry and not contaminated with precipitation water.</td>
</tr>
<tr>
<td>B</td>
<td>Biased sample - Lid on NADP sampler malfunctions and sample includes dry deposition.</td>
</tr>
<tr>
<td>DC</td>
<td>Dry deposition sample - dry bucket contains rain water and other insects/contaminants.</td>
</tr>
</tbody>
</table>

### Enumerated Domain for Attribute: QCCODE

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>NA</td>
<td>Water sample is not a quality control sample.</td>
</tr>
<tr>
<td>QZ</td>
<td>Miscellaneous quality control water sample.</td>
</tr>
</tbody>
</table>

### Enumerated Domain for Attribute: SAMPLER_TYPE

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>BC</td>
<td>Bulk collection includes both wet and dry deposition.</td>
</tr>
<tr>
<td>NP</td>
<td>NADP-type sampler that separates wet deposition from dry deposition.</td>
</tr>
<tr>
<td>RC</td>
<td>Bulk samples from original, locally-designed rain collectors that includes both wet and dry deposition.</td>
</tr>
</tbody>
</table>

### Enumerated Domain for Attribute: LOW_VOLUME

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>N</td>
<td>Sample is of sufficient volume for laboratory analyses.</td>
</tr>
<tr>
<td>Y</td>
<td>Sample is low volume and laboratory analyses may be limited.</td>
</tr>
</tbody>
</table>
