Title: Cone production of upper slope conifers in the Cascade Range of Oregon and Washington, 1959 to present

Abstract:
Seed supply is a key feature of tree population dynamics, and seed production may be indicative of environmental and biological drivers. This study examines cone production in upper-slope, true fir-hemlock forests of the Pacific Northwest, starting in 1959 to the present. Annual surveys of cone counts of Abies spp. (A. amabilis, A. concolor, A. grandis, A. lasiocarpa, A. magnifica, A. procera), Pinus spp. (P. engelmannii, P. lamberti, P. monticola), and Tsuga spp. (T mertensiana) have been conducted at sixty-one plots in 37 locations in nine national forests in Washington and Oregon (originally 10 national forests, but Mt. Baker and Snoqualimie were combined). At each site, a visual count is made of cone production in each of a number (20-30) trees in a stand of one tree species. At some plots, additional trees were added in the 1980s. Primary data include numbers of counts per tree per year, periodic measurements of tree diameter, and the names of the sites. These data illustrate the periodicity of cone production cycles, as well as longer trends associated with climate change and variability in the region.

List of Entities:
1. Plots and species
2. Cone Counts
3. Tree Diameters
4. Directions to plots

1. Plots and species

Attribute List:
- DBCODE  N  N  char(10)  enum
- ENTITY   N  N  numeric(1,0)  range  1.0000  1.0000  number
- STATE    N  N  char(10)  place
- NATIONAL_FOREST N  N  char(40)  place
- LOC_NAME N  N  varchar(40)  freetext
- LOC_CODE N  N  varchar(40)  freetext
- SPECIES  N  N  char(6)  taxa
- PLOT     Y  N  char(7)  place

2. Cone Counts

Attribute List:
- DBCODE  N  N  char(10)  enum
- ENTITY   N  N  numeric(1,0)  range  2.0000  2.0000  number
- LOC_NAME N  Y  varchar(40)  freetext
- LOC_CODE N  Y  char(6)  taxa
- SPECIES  N  Y  char(6)  taxa
- PLOT     Y  N  char(7)  place  1.0000  62.0000

Attributes Definitions:

- **COMMENT**: Comments
- **CONECOUNT**: Number of cones
- **CROWN_PCT**
Percent of a tree's live crown volume that is still intact along the stem; record for living trees begins in 2019

CROWN_RATIO

Percent of a tree's height with live branches around one third or more of the bole's circumference; record for living trees begins in 2019

DBCODE

FSDB Database Code

DBH

Diameter at breast height

DIRECTIONS

Directions for reaching the plots

ENTITY

Data table entity number

LOC_CODE

Location code

LOC_NAME

Location name

NATIONAL_FOREST

National Forest in which plot resides

PLOT

Unique plot number

SAMPLEDATE

Date of remeasurement; record for living trees begins in 2019

SPECIES

Species code

STATE

State in which the plot resides

STATUS

Status of tree (live, dead, missing)

TAG

Tag number (alternative method of tree identification)

TREE_VIGOR

Overall tree vigor code; record for living trees begins in 2019

TREENR

Tree number, unique for plot

WEATHER_VISIBILITY

Additional comments on weather conditions and visibility to give some perspective on how these conditions may have influenced count quality; record for living trees begins in 2019

YEAR

Year of count
Enumerated Domains:

Enumerated Domain for Attribute: DBCODE
   TV019 FSDB Database code TV019

Enumerated Domain for Attribute: STATUS
   G  Normal count
   D  Dead, cut or broken; tree abandoned
   M  Missing data; not counted because tree was not found or road access closed

Enumerated Domain for Attribute: DBCODE
   TV019 FSDB Database code TV019

Enumerated Domain for Attribute: TREE_VIGOR
   1  Good vigor: no apparent signs of distress
   2  Fair vigor: some signs of distress apparent (e.g., discolored foliage, paucity of leaves or needles, broken stem with few live branches)
   3  Poor vigor: extreme distress apparent (i.e., death imminent)
   M  Vigor is not recorded for dead or missing trees
   U  Unknown vigor of a living tree - vigor is not recorded

Enumerated Domain for Attribute: DBCODE
   TV019 FSDB Database code TV019

Enumerated Domain for Attribute: DBCODE
   TV019 FSDB Database code TV019
